Astrophysics

Abundances of rare-earth nuclei produced by rapid neutron capture in supernovae, Robert A. Becker and William A. Fowler—1410

Role of fusion chain reactions in nonstationary evolution of stars—supernova stars, Michał Gryziński—1087

Atmosphere (see **Geophysics**)

Atomic and Molecular Beams

Crystal atom spacing and wavelength of incident atom beam, Robert E. Davidson—570

Nuclear spins of Ag^{104} and Ag^{106}, W. B. Ewbank, L. L. Marino, W. A. Nierenberg, H. A. Shugart, and H. B. Silsbee—614

Atomic Mass and Abundance

Abundances of rare-earth nuclei produced by rapid neutron capture in supernovae, Robert A. Becker and William A. Fowler—1410

C^{14}-N^{14} mass difference and mass excesses of some light nuclides, L. Friedman, W. Henkes, and D. Christman—166

Ratios of relative abundance, magnetic moments, and capture cross sections of Gd isotopes from paramagnetic resonance spectrum, W. Low and D. Shaltiel—424

Atomic Structure and Spectra

Absorption by gaseous He in extreme uv, Norman N. Axelrod and M. Parker Givens—97

Antishielding and polarizabilities in alkali halide gases, Gerald Burns—357

Application of wave functions containing interelectron coordinates. I. Ground-state energy of Li, Peter Walsh and Sidney Borowitz—1206

Determination of dipole moment and isotope shift of radioactive Hg^{197} by "double resonance", Adrian C. Melissinos—126

Dipole and quadrupole moments of isomeric Hg^{197*} nucleus; isomeric isotope shift, Adrian C. Melissinos and Sumner P. Davis—130

Dispersive effects in electron-nucleus interactions, Nicholas A. Krall and E. E. Salpeter—457

Electronic polarizabilities of ions, R. M. Sternheimer—1198

Atomic Structure and Spectra (Continued)
Energy levels for rare earth ions subject both to exchange and crystalline fields, Robert L. White and John P. Andelin, Jr.—1435
Frequency shifts in hyperfine splitting of alkalis caused by foreign gases, H. Margenau, P. Fontana, and L. Klein—87
Ground state of He atom. II, Toichiro Kinoshita—366
Isotope shift of He $2P$, Gentaro Araki, Koichi Mano, and Masao Ohta—1222
Meson corrections to hfs in hydrogen, C. K. Iddings and P. M. Platzman—919
Metastability of $2s$ states of hydrogenic atoms, J. Shapiro and G. Breit—1779(E)
$1\,^1S$ and $2\,^3S$ states of He, C. L. Pekeris—1216
Total photoelectric cross sections of Cu, Mo, Ag, Ta, and Au at 662 kev, W. F. Titus—351
Wave function for free electron. I. Coulomb potential, R. G. Breene, Jr., and Maria C. Nardone—93
Auger Effect (see **Atomic Structure and Spectra; X-Rays**)
Aurora (see **Astrophysics; Geophysics**)

Barkhausen Effect (see **Magnetic Properties**)
Biophysics
Boson Theory (see **Field Theory**)
Bremsstrahlung (see **Radiation**)

Crystal Counters (see **Methods and Instruments**)

Crystalline State (see also **Electrical Properties; Imperfections in Solids; Magnetic Properties; Semiconductors; etc.**)
Acoustic attenuation in Al due to electron-lattice interaction, Edward Lax—1591
Analytic properties of Bloch waves and Wannier functions, W. Kohn—809
Anomalous skin effect in Bi, George E. Smith—1561
Antiferromagnetic magnon dispersion law and Bloch wall energies in ferromagnets and antiferromagnets, R. Orbach—1181
Application of wave functions containing interelectron coordinates. I. Ground-state energy of Li, Peter Walsh and Sidney Borowitz—1206
Band structure of noble metal alloys: optical absorption in α-brasses at 4.2°K, M. A. Biondi and J. A. Rayne—1522
Calculation of specific heat of some alkali halides, Clark Oliphint—296
Configuration interaction in alkali halide phosphors, Robert S. Knox—1095
Crystal atom spacing and wavelength of incident atom beam, Robert E. Davidson—570
Crystal structure of ferroelectric phase of $(\text{glycine})_3 \cdot H_2SO_4$, S. Hoshino, Y. Okaya, and R. Pepinsky—323
d bands in bcc lattice, Joseph Callaway—346
Effects of MnO and CoO on 0.24-ev NiO absorption line, R. Newman and R. M. Chrenko—882
Elastic constants of α brasses: variation with solute concentration from 4.2–300°K, J. A. Rayne—63
Electrodynamics of charge carriers of negative effective mass in crystals, Sergio Rodriguez—821
Energy dependence of recovery in irradiated Cu, J. W. Corbett and R. M. Walker—67
Energy levels for rare earth ions subject both to exchange and crystalline fields, Robert L. White and John P. Andelin—1435
Energy levels of conduction electrons in magnetic field, Y. Yafet—1172
Further experiments on sidewise motion of 180° domain walls in $BaTiO_3$, Robert C. Miller and Albert Savage—1176
Green's function approximation method. II. The polaron, David S. Falk—1074
Influence of collective effects on magnetoresistance of metals, Rosemary A. Coldwell-Horsfall and D. ter Haar—891
Infrared absorption from $\mathbf{L}\cdot\mathbf{S}$ splittings in Co^{2+} salts, R. Newman and R. M. Chrenko—1147
Kinetics of vacancy motion in high-purity Al, Warren DeSorbo and David Turnbull—560
Low-temperature ultrasonic attenuation in Sn and Al, Daniel H. Filson—1516
Magnetic susceptibility of close-packed hexagonal Au-In alloys, T. B. Massalski, L. Meyer, and D. Weiner—301
Many-particle approach to one-electron problem in insulators and semiconductors, Abraham Klein—1136
Meissner-Ochsenfeld effect in Bogoljubov theory, R. M. May and M. R. Schafroth—1446
Nature of singularities in spectrum of one-dimensional ionic lattice, Joseph Gillis and George Weiss—1520
New approach to theory of superexchange interactions, P. W. Anderson—2
New quantum-mechanical representation, E. C. McIrvine and A. W. Overhauser—1531
Nitrogen, a major impurity in common type I diamonds, W. Kaiser and W. L. Bond—857
Nonresonant nuclear spin absorption in Li, Na, and Al, A. G. Anderson—863
Origin of characteristic electron energy losses in Al, C. J. Powell and J. B. Swan—869

Properties of alkali halide crystals at low temperatures, T. H. K. Barron and J. A. Morrison—1439
Quantum-mechanical approach to thermal transport phenomena in metals, B. C. McIrvine—1537
Saturation of paramagnetic resonance of V center, T. G. Castner, Jr.—1506
Self-consistent field approach to many-electron problem, H. Ehrenreich and M. H. Cohen—786
Simplified LCAO method for zincblende, wurtzite, and mixed crystal structures, Joseph L. Birman—1493
Spin wave spectra for canted antiferromagnets and ferromagnets, R. Orbach—1189
Splittings of paramagnetic atoms in crystalline fields, H. Statz and G. F. Koster—1568
Surface states in metals, G. Bonfiglioli and R. Malvano—330
Theory of Bloch electrons in magnetic field. Effective Hamiltonian, Walter Kohn—1460
Theory of nuclear magnetic resonance shift in paramagnetic crystals, F. Keffer, T. Oguchi, W. O'Sullivan, and J. Yamashita—1553
Theory of superexchange, F. Keffer and T. Oguchi—1428
Ultrasonic attenuation in Bi at low temperatures, Darrell H. Reneker—303
Variational approach to deviations from Ohm's law, I. Adawi—1152
Vibration frequency spectra of disordered lattices. I. Moments of spectra for disordered linear chains, C. Domb, A. A. Maradudin, E. W. Montroll, and G. H. Weiss—18; II. Spectra of disordered one-dimensional lattices, C. Domb, A. A. Maradudin, E. W. Montroll, and G. H. Weiss—24
X-ray measurement of atomic scattering factor of Fe, Boris W. Batterman—81

Diamagnetism (see **Magnetic Properties**)
Dielectrics and Dielectric Properties
Crystal structure of ferroelectric phase of $(glycine)_3 \cdot H_2SO_4$, S. Hoshino, Y. Okaya, and R. Pepinsky—323
Electron paramagnetic resonance in $SrTiO_3$, W. I. Dobrov, R. F. Vieth, and M. E. Browne—79
Further experiments on sidewise motion of 180° domain walls in $BaTiO_3$, Robert C. Miller and Albert Savage—1176
Many-particle approach to one-electron problem in insulators and semiconductors, Abraham Klein—1136
Piezoresistance of n-type Ge, H. Fritzsche—336
Self-consistent field approach to many-electron problem, H. Ehrenreich and M. H. Cohen—786
Diffraction (see also **Scattering**)
Antiferromagnetic structures of MnS_2, $MnSe_2$, and $MnTe_2$, J. M. Hastings, N. Elliott, and L. M. Corliss—13
Crystal atom spacing and wavelength of incident atom beam, Robert E. Davidson—570
Inelastic diffraction scattering, John S. Blair—928
X-ray measurement of atomic scattering factor of Fe, Boris W. Batterman—81
Diffusion
Diffusion measurements in system Cu-Au by elastic scattering, Robert F. Sippel—1441
Kinetics of vacancy motion in high-purity Al, Warren DeSorbo and David Turnbull—560
Self-diffusion and nuclear relaxation in He^3, R. L. Garwin and H. A. Reich—1478
Discharge of Electricity in Gases (see **Electrical Discharges**)
Disintegration and Excitation of Nucleus (see **Nuclear Reactions**)
Dynamics (see **Mechanics**)

Elasticity and Plasticity
Dislocation dynamics at low temperatures, J. Lothe and J. P. Hirth—543
Elastic constants of α-brasses: variation with solute concentration from 4.2–300°K, J. A. Rayne—63
Properties of alkali halide crystals at low temperatures, T. H. K. Barron and J. A. Morrison—1439
Electrical Breakdown (see **Dielectrics and Dielectric Properties; Electrical Discharges**)
Electrical Conductivity and Resistance (see also **Electrical Properties; Semiconductors; Superconductors**)
Anomalous skin effect in Bi, George E. Smith—1561
Dependence of hole ionization energy of imperfections in CdS on impurity concentration, Richard H. Bube and Arthur B. Dreeben—1578
Electrodynamics of charge carriers of negative effective mass in crystals, Sergio Rodriguez—821
Energy levels of conduction electrons in magnetic field, Y. Yafet—1172
Gain-bandwidth product of photoconductors, R. W. Redington—894
Influence of collective effects on magnetoresistance of metals, Rosemary A. Coldwell-Horsfall and D. ter Haar—891
Low-temperature transport properties of Cu and its dilute alloys: pure Cu, annealed and cold-drawn, Robert L. Powell, Hans M. Roder, and William J. Hall—314
Magnetoresistance in multivalley model with (110)-ellipsoids of general shape, Robert S. Allgaier—1185
Metal to semiconductor contacts. Injection or extraction for either direction of current flow, N. J. Harrick—876
Photoconductivity of GaSe crystals, Richard H. Bube and Edward L. Lind—1159
Polarization processes in partially illuminated photoconducting insulators, M. Y. Ben Sira, B. Pratt, E. Harnik, and A. Many—554
Theory of Bloch electrons in magnetic field. Effective Hamiltonian, Walter Kohn—1460
Variational approach to deviations from Ohm's Law, I. Adawi—1152
Electrical Discharges
Dissipation of currents in ionized media, O. Buneman—503
Electric field distributions in ionized gas, Michel Baranger and Bernard Mozer—521
Electron and ion run-away in fully ionized gas. I, H. Dreicer—238
Electrical Properties (see also **Dielectrics and Dielectric Properties; Electrical Conductivity and Resistance; Semiconductors; Superconductors**)
Effect of O_2 on work function of Ba, P. A. Anderson and A. L. Hunt—550
Low-temperature transport properties of Cu and its dilute alloys: pure Cu, annealed and cold-drawn, Robert L. Powell, Hans M. Roder, and William J. Hall—314
Nernst and Ettinghausen effects in Ge between 300 and 700°K, Herbert Mette, Wolfgang W. Gärtner, and Claire Loscoe—537
Proposed direct test of uncertainty principle, P. R. Ryason—784
Recombination properties of Ni in Ge, G. K. Wertheim—37
Structure in energy distribution of photoelectrons from K_3Sb and Cs_3Sb, E. A. Taft and H. R. Philipp—1583
Surface states in metals, G. Bonfiglioli and R. Malvano—330
Total photoelectric cross sections of Cu, Mo, Ag, Ta, and Au at 662 kev, W. F. Titus—351
Work function of Au, Paul A. Anderson—553
Electrodynamics (see **Electromagnetic Theory and Electrodynamics**)
Electroluminescence (see **Luminescence**)
Electrolysis (see **Chemical Effects and Properties**)

Electrostriction (see **Dielectrics and Dielectric Properties**)
Elementary Particle Interactions, General
Charge exchange scattering of 128-Mev negative pions on hydrogen, E. Garwin, W. Kernan, C. O. Kim, and C. M. York—1295
Inelastic final-state interactions. K^- absorption in deuterium, Robert Karplus and Leonard S. Rodberg—1058
Interference effects in leptonic decays, Steven Weinberg—481
Low-energy antiproton interactions in H and D, Nahmin Horwitz, Donald Miller, Joseph Murray, and Robert Tripp—472
Meson corrections to hfs in hydrogen, C. K. Iddings and P. M. Platzman—919
Meson-meson scattering term in *ps-ps* meson theory, M. Sugawara and A. Kanazawa—1310
Nuclear interactions at energies over 1000 Bev, J. G. McEwen—1712
Parities of K-hyperon pairs, Richard H. Capps—736
p-p scattering at 90° from 28 to 68 Mev, Lawrence H. Johnston and Yung Su Tsai—1293
Production of Σ^+ hyperons by 990-Mev positive pions in liquid hydrogen, A. R. Erwin, Jr., J. K. Kopp, and A. M. Shapiro—669
Proposal for determining electromagnetic form factor of pion, William R. Frazer—1763
Proton-neutron mass difference, Sigenobu Sunakawa and Katsumi Tanaka—754
Recoil momentum distribution in electron pair production, K. S. Suh and H. A. Bethe—672
Relativistic theory of unstable particles. II, P. T. Matthews and Abdus Salam—1079
Spontaneous nuclear reaction in molecular H_2, Richard G. Brewer—1290
Strange particle production by Bev neutrons in propane, Charles O. Dechand—1730
Three-pion contribution to electromagnetic structure of nucleon, B. Bosco and V. De Alfaro—215
Useful symmetries of strong interactions, J. J. Sakurai—1304
Elementary Particle Interactions, Electromagnetic
Circular polarization of γ radiation following allowed β transitions, R. M. Steffen—980
Electron pair production in field of proton and in field of electron by photons of energy from 10 Mev to 1 Bev, E. L. Hart, G. Cocconi, V. T. Cocconi, and J. M. Sellen—678
Inelastic electron-deuteron scattering cross sections at high energies, Loyal Durand, III—1020
Interference effects of retardation term in pion photoproduction, A. M. Wetherell—1722
Meson corrections to hfs in hydrogen, C. K. Iddings and P. M. Platzman—919
Photoproduction of K^+ mesons, B. D. McDaniel, A. Silverman, R. R. Wilson, and G. Cortellessa—1039
Proposal for determining electromagnetic form factor of pion, William R. Frazer—1763
Proton-neutron mass difference, Sigenobu Sunakawa and Katsumi Tanaka—754
Radiative muon capture, Jeremy Bernstein—694
Recoil momentum distribution in electron pair production, K. S. Suh and H. A. Bethe—672
Three-pion contribution to electromagnetic structure of nucleon, B. Bosco and V. De Alfaro—215
Elementary Particle Interactions, Strong
Anomalous magnetic moments of baryons in static cutoff perturbation theory, W. G. Holladay—1331
Charge exchange scattering of 128-Mev negative pions on hydrogen, E. Garwin, W. Kernan, C. O. Kim, and C. M. York—1295
Fixed angle dispersion relations for nucleon-nucleon scattering, M. Cini, S. Fubini, and A. Stanghellini—1779(E)
Hyperon β decay, C. H. Albright—750
Inelastic final-state interactions. K^- absorption in deuterium, Robert Karplus and Leonard S. Rodberg—1058
Interference effects of retardation term in pion photoproduction, A. M. Wetherell—1722
K^+-deuteron scattering in impulse approximation, Erasmo M. Ferreira—1727
Low-energy antiproton interactions in H and D, Nahmin Horwitz, Donald Miller, Joseph Murray, and Robert Tripp—472
Meson corrections to hfs in hydrogen, C. K. Iddings and P. M. Platzman—919
Meson-meson scattering term in *ps-ps* meson theory, M. Sugawara and A. Kanazawa—1310
Parities of K-hyperon pairs, Richard H. Capps—736
Photoproduction of K^+ mesons, B. D. McDaniel, A. Silverman, R. R. Wilson, and G. Cortellessa—1039
Pion-pion interaction in τ^+-meson decay, Billy S. Thomas and W. G. Holladay—1329
Production of Σ^+ hyperons by 990-Mev positive pions in liquid hydrogen, A. R. Erwin, Jr., J. K. Kopp, and A. M. Shapiro—669
Proton-neutron mass difference, Sigenobu Sunakawa and Katsumi Tanaka—754
Some consequences of symmetries of strong interactions, G. Feinberg and R. E. Behrends—745
Strange particle production by Bev neutrons in propane, Charles O. Dechand—1730
Test of global symmetry in K^--p reactions, Marc H. Ross and Gordon L. Shaw—1773
Three-pion contribution to electromagnetic structure of nucleon, B. Bosco and V. De Alfaro—215
Useful symmetries of strong interactions, J. J. Sakurai—1304

Optical properties of activated and unactivated hexagonal ZnS single crystals, S. P. Keller and G. D. Pettit—526

Magnetic Fields (see **Electromagnetic Theory and Electrodynamics**)
Magnetic Properties
Antiferromagnetic magnon dispersion law and Bloch wall energies in ferromagnets and antiferromagnets, R. Orbach—1181
Antiferromagnetic structures of MnS_2, $MnSe_2$, and $MnTe_2$, J. M. Hastings, N. Elliott, and L. M. Corliss—13
Cooling by adiabatic magnetization, W. P. Wolf—1196
Dipolar line broadening and enhanced pseudo-dipolar moments, Robert L. White—1519
Effects of MnO and CoO on 0.24-ev NiO absorption line, R. Newman and R. M. Chrenko—882
Ferromagnetic and antiferromagnetic Curie temperatures, H. A. Brown and J. M. Luttinger—1778(E)
Ferromagnetic solutes in superconductors, Bernd Matthias, Vera B. Compton, Harry Suhl, and Ernest Corenzwit—1597
Magnetic susceptibility of close-packed hexagonal Au-In alloys, T. B. Massalski, L. Meyer, and D. Weiner—301
Magnetic susceptibility of InSb, R. Bowers and Y. Yafet—1165
Magnetic susceptibility of Th metal in range 130–300°K, J. F. Smith and J. D. Greiner—884
Magnetization of compounds of rare earths with Pt metals, R. M. Bozorth, B. T. Matthias, H. Suhl, E. Corenzwit, and D. D. Davis—1595
New approach to theory of superexchange interactions, P. W. Anderson—2
Spin-wave spectra for canted antiferromagnets and ferromagnets, R. Orbach—1189
Statistical mechanical theory of random ferromagnetic system, R. Brout—824
Suggestion concerning magnetic interaction in spinels, D. J. Wickham and J. B. Goodenough—1156
Theory of superexchange, F. Keffer and T. Oguchi—1428
Thermal expansion coefficients of MnF, D. F. Gibbons—1194
X-ray measurement of atomic scattering factor of Fe, Boris W. Batterman—81
Magnetic Resonance (see also **Nuclear Moments and Spin**)
Application of diffusion-modified Bloch equation to electron spin resonance in ordinary and ferromagnetic metals, Jerome I. Kaplan—575
Approach to Boltzmann equilibrium of nuclear spins in quadrupolar solid, Walter I. Goldburg—48
Determination of dipole moment and isotope shift of radioactive Hg^{197} by "double resonance", Adrian C. Melissinos—126
Dipolar line broadening and enhanced pseudo-dipolar moments, Robert L. White—1519
Electron paramagnetic resonance in $SrTiO_3$, W. I. Dobrov, R. F. Vieth, and M. E. Browne—79
Electron-spin resonance of N donors in diamond, W. V. Smith, P. P. Sorokin, I. L. Gelles, and G. J. Lasher—1546
Magnetic moment of triton in units of magnetic moment of proton, William Duffy, Jr.—1012
Nonresonant nuclear spin absorption in Li, Na, and Al, A. G. Anderson—863
Nuclear spin relaxation in liquid He^3, R. H. Romer—1415
Paramagnetic relaxation in Ni fluosilicate, K. D. Bowers and W. B. Mims—285
Ratios of relative abundance, magnetic moments, and capture cross sections of Gd isotopes from paramagnetic resonance spectrum, W. Low and D. Shaltiel—424
Saturation of paramagnetic resonance of *V* center, T. G. Castner, Jr.—1506
Self-diffusion and nuclear relaxation in He^3, R. L. Garwin and H. A. Reich—1478
Spin relaxation of optically aligned Rb vapor, W. Franzen—850
Spin-wave spectra for canted antiferromagnets and ferromagnets, R. Orbach—1189
Splittings of paramagnetic atoms in crystalline fields, H. Statz and G. F. Koster—1568
Theory of ferromagnetic resonance in rare earth garnets. I. *g* values, C. Kittel—1587
Theory of nuclear magnetic resonance shift in paramagnetic crystals, F. Keffer, T. Oguchi, W. O'Sullivan, and J. Yamashita—1553

Magnetohydrodynamics (see **Fluid Dynamics**)
Magneto-Optical Effects (see **Optical Properties**)
Magnetoresistance (see **Electrical Conductivity and Resistance; Semiconductors**)
Magnetostriction (see **Magnetic Properties**)
Mass Defects (see **Atomic Mass and Abundance**)
Mass Spectroscopy (see **Atomic Mass and Abundance; Methods and Instruments**)
Mathematical Methods
Measurements (see **Methods and Instruments**)
Mechanics
Adiabatic invariants of periodic classical systems, C. S. Gardner—791
General relativity and particle dynamics, L. H. Thomas—1778(E)
Mechanics, Quantum—Atomic Structure and Spectra (see **Atomic Structure and Spectra**)
Mechanics, Quantum—General (see **Quantum Mechanics**)
Mechanics, Quantum—Molecular Structure and Spectra (see **Molecular Structure and Spectra**)
Mechanics, Quantum—Nuclear (see **Nuclear Structure Theory**)
Mechanics, Quantum—of Solid Bodies (see **Crystalline State**)
Mechanics, Statistical (see **Statistical Mechanics and Thermodynamics**)
Meson Field Theory (see **Field Theory**)
Mesons and Hyperons (see also **Cosmic Radiation; Elementary Particle Interactions; Nuclear Reactions Induced by Mesons and Hyperons; Scattering of Mesons and Hyperons**)
Anomalous magnetic moments of baryons in static cutoff perturbation theory, W. G. Holladay—1331
Charge exchange scattering of 128-Mev negative pions on hydrogen, E. Garwin, W. Kernan, C. O. Kim, and C. M. York—1295
Heavy nuclei and α particles between 7 and 100 Bev/nucleon. I. Interaction mean free paths and fragmentation probabilities, E. Lohrmann and M. W. Teucher—636; II. Fragmentations and meson production, P. L. Jain, E. Lohrmann, and M. W. Teucher—643
Hyperon β decay, C. H. Albright—750
Inelastic final-state interactions. K^- absorption in deuterium, Robert Karplus and Leonard S. Rodberg—1058
Interference effects of retardation term in pion photoproduction, A. M. Wetherell—1722
K^+-deuteron scattering in impulse approximation, Erasmo M. Ferreira—1727
Nuclear interaction of θ_2 mesons in emulsion, U. Camerini, W. F. Fry, M. Baldo-Ceolin, H. Huzita, and S. Natali—1048
Parities of K-hyperon pairs, Richard H. Capps—736
Phenomenological analysis of hyperon decay, S. A. Bludman—468
Photoproduction of K^+ mesons, B. D. McDaniel, A. Silverman, R. R. Wilson, and G. Cortellessa—1039
Pion-pion interaction in τ^+-meson decay, Billy S. Thomas and W. G. Holladay—1329
Production of Σ^+ hyperons by 990-Mev positive pions in liquid hydrogen, A. R. Erwin, Jr., J. K. Kopp, and A. M. Shapiro—669
Proposal for determining electromagnetic form factor of pion, William R. Frazer—1763
Radiative muon capture, Jeremy Bernstein—694
Search for 550m_e particles in sea-level cosmic radiation, I. B. McDiarmid—1016
Some consequences of symmetries of strong interactions, G. Feinberg and R. E. Behrends—745
Strange particle production by Bev neutrons in propane, Charles O. Dechand—1730
Metals (see **Crystalline State**)
Metastable Atoms (see **Atomic Structure and Spectra**)
Metastable Molecules (see **Molecular Structure and Spectra**)
Meteorology (see **Geophysics**)
Methods and Instruments
Cooling by adiabatic magnetization, W. P. Wolf—1196
Intersecting beam systems with storage rings, G. K. O'Neill and E. J. Woods—659
Microwaves (see also **Atomic Structure and Spectra; Magnetic Resonance; Molecular Structure and Spectra; Nuclear Moments and Spin**)
Induced and spontaneous emission in coherent field. II, I. R. Senitsky—227
Miscellaneous
Mobility of Ions and Electrons (see **Ions and Electrons, Mobility**)
Molecular Aggregates
Molecular Beams (see **Atomic and Molecular Beams**)
Molecular Structure and Spectra
Electric and magnetic properties of H_2 molecule, T. P. Das and R. Bersohn—897
Electron affinity of O_2, R. S. Mulliken—1225
Spontaneous nuclear reaction in molecular H_2, Richard G. Brewer—1290
Moments, Nuclear (see **Nuclear Moments and Spin**)
Moments of Molecules (see **Molecular Structure and Spectra**)
Muonium (see **Atomic Structure and Spectra; Mesons and Hyperons**)

Neutrinos and Antineutrinos (see also **Nuclear Spectra; Radioactivity**)
Neutron Diffraction (see **Diffraction; Scattering of Neutrons**)
Neutrons (see **Elementary Particle Interactions**)
Noise
Crystalline imperfections and $1/f$ noise, James J. Brophy—1122
Nuclear Fission
Measurement of fission thresholds of Pu^{239}, U^{233}, U^{235}, and U^{238} using (d,p) reaction, John A. Northrop, Richard H. Stokes, and Keith Boyer—1277
Neutron fission cross sections of Pu^{236} and Pu^{237}, J. E. Gindler, J. Gray, Jr., and J. R. Huizenga—1271
Number of prompt neutrons emitted per Th^{232} fission, A. B. Smith, R. G. Nobles, and S. A. Cox—1242
Radiochemical studies of fission of U^{235} by He ions, R. Gunnink and J. W. Cobble—1247
Nuclear Forces (see **Elementary Particle Interactions; Field Theory; Nuclear Structure Theory**)
Nuclear Induction (see **Magnetic Resonance; Nuclear Moments and Spin**)
Nuclear Isomers (see **Nuclear Spectra; Radioactivity**)
Nuclear Moments and Spin
Antishielding and polarizabilities in alkali halide gases, Gerald Burns—357
Determination of dipole moment and isotope shift of radioactive Hg^{197} by "double resonance," Adrian C. Melissinos—126
Dipole and quadrupole moments of isomeric Hg^{197*} nucleus; isomeric isotope shift, Adrian C. Melissinos and Sumner P. Davis—130
Magnetic moment of triton in units of magnetic moment of proton, William Duffy, Jr.—1012
Magnetic moments of strongly deformed odd-odd nuclei, W. M. Hooke—453
Nuclear spins of Ag^{104} and Ag^{106}, W. B. Ewbank, L. L. Marino, W. A. Nierenberg, H. A. Shugart, and H. B. Silsbee—614
Ratios of relative abundance, magnetic moments, and capture cross sections of Gd isotopes from paramagnetic resonance spectrum, W. Low and D. Shaltiel—424
Spin-orbit contributions to H^3-He^3 magnetic moments, Jay M. Berger—384

Nuclear Photoeffects
Excitation function for $V^{51}(\gamma,\alpha)Sc^{47}$ reaction, Palmer Dyal and John P. Hummel—1264
Interference effects of retardation term in pion photoproduction, A. M. Wetherell—1722
Photonuclear reaction energies, A. S. Penfold and E. L. Garwin—420
Photoproduction of K^+ mesons, B. D. McDaniel, A. Silverman, R. R. Wilson, and G. Cortellessa—1039

Nuclear Reactions, General (see also **Elementary Particle Interactions; Scattering**)
Precise determination of nuclear reaction energies and measurements of resonance widths, R. O. Bondelid and C. A. Kennedy—1601
Role of fusion chain reactions in nonstationary evolution of stars-supernova stars, Michał Gryziński—1087
Simple model for giant resonance effects in nuclear reactions, W. Tobocman and D. E. Bilhorn—1275
Spontaneous nuclear reaction in molecular H_2, Richard G. Brewer—1290

Nuclear Reactions Induced by α Particles and He^3 (see also **Scattering of α Particles and He^3**)
Analysis of angular distributions in reaction $B^{11}(\alpha,p)C^{14}$, L. L. Lee, Jr., and J. P. Schiffer—160
Differential cross sections of some (α,p) reactions, C. E. Hunting and N. S. Wall—956
Excitation functions for α-induced reactions on Zn^{64}, Norbert T. Porile—939
He^3- and He^4-induced Coulomb excitation, D. A. Bromley, J. A. Kuehner, and E. Almqvist—586
Optical-model analysis of excitation function data and theoretical reaction cross sections for α particles, George Igo—1665
Radiochemical studies of fission of U^{235} by He ions, R. Gunnink and J. W. Cobble—1247

Nuclear Reactions Induced by Deuterons and Tritons (see also **Scattering of Deuterons and Tritons**)
Angular distributions of protons from (d,p) reaction with deuteron energies below Coulomb barrier, J. P. Schiffer and L. L. Lee, Jr.—1705
Measurement of fission thresholds of Pu^{239}, U^{233}, U^{235}, and U^{238} using (d,p) reaction, John A. Northrop, Richard H. Stokes, and Keith Boyer—1277
Neutron polarization in reaction $D(d,n)He^3$ at $E_d=8.2$ Mev, Wilfried W. Daehnick—1008
Numerical evaluation of deuteron stripping cross sections and polarizations, W. Tobocman—98
Results of stripping analysis of reaction $K^{39}(d,p)K^{40}$, H. A. Enge, E. J. Irwin, Jr., and D. H. Weaner—949
Scattering of 29.2-Mev He^3 nuclei by deuterons, J. S. C. McKee, D. R. Sweetman, P. V. March, W. T. Toner, and W. M. Gibson—143
Single-particle states of neutron from gross structure in proton spectra of (d,p) reactions, J. P. Schiffer, L. L. Lee, Jr., and B. Zeidman—427

Nuclear Reactions Induced by Mesons and Hyperons (see also **Elementary Particle Interactions; Mesons and Hyperons; Scattering of Mesons and Hyperons**)
Nuclear interaction of θ_2 mesons in emulsion, U. Camerini, W. F. Fry, M. Baldo-Ceolin, H. Huzita, and S. Natali—1048
Production of Σ^+ hyperons by 990-Mev positive pions in liquid hydrogen, A. R. Erwin, Jr., J. K. Kopp, and A. M. Shapiro—669

Nuclear Reactions Induced by Neutrons (see also **Elementary Particle Interactions; Scattering of Neutrons**)
Absolute activation cross sections for reactions of Bi, Cu, Ti, and Al with 14.8-Mev neutrons, A. Poularikas and R. W. Fink—989
Abundances of rare-earth nuclei produced by rapid neutron capture in supernovae, Robert A. Becker and William A. Fowler—1410
Angular distributions of proton groups from $Al^{27}(n,p)Mg^{27}$ reaction at 14 Mev, O. E. Overseth, Jr., and R. A. Peck, Jr.—993
Cross section for $Li^6(n,\alpha)H^3$ reaction for $1.2\leq E_n\leq 8.0$ Mev, R. B. Murray and H. W. Schmitt—1707
Low-energy capture γ-rays of Eu^{153} and Eu^{154}, Eugene T. Patronis, Jr., and Harvey Marshak—1287
Neutron fission cross sections of Pu^{236} and Pu^{237}, J. E. Gindler, J. Gray, Jr., and J. R. Huizenga—1271
Number of prompt neutrons emitted per Th^{232} fission, A. B. Smith, R. G. Nobles, and S. A. Cox—1242
Ratios of relative abundance, magnetic moments, and capture cross sections of Gd isotopes from paramagnetic resonance spectrum—424
Simple model for giant resonance effects in nuclear reactions, W. Tobocman and D. E. Bilhorn—1275
Statistics of slow-neutron "negative" energy resonances, P. A. Egelstaff—182
Strange particle production by Bev neutrons in propane, Charles O. Dechand—1730
Total neutron cross section of Xe^{135} as function of energy, E. C. Smith, G. S. Pawlicki, P. E. F. Thurlow, G. W. Parker, W. J. Martin, G. E. Creek, and P. M. Lantz—1693

Nuclear Reactions Induced by Protons (see also **Elementary Particle Interactions; Scattering of Protons**)
Elastic scattering and capture of protons by C^{14}, D. F. Hebbard and D. N. F. Dunbar—624
Energy levels in Na^{23} from $Ne^{22}(p,\gamma)Na^{23}$ reaction, J. J. Singh, V. W. Davis, and R. W. Krone—170
γ rays from $Si^{29}+p$, J. J. Singh—445
Interaction of Y with protons of energy between 60 and 240 Mev, Albert A. Caretto, Jr., and Edwin O. Wiig—1238
Investigations of $Be^9(p,n)B^9$ and $Be^9(p,\alpha\gamma)Li^6$ reactions, Jerry B. Marion and Jules S. Levin—144
(p,n) cross section and proton optical model parameters in 4- to 5.5-Mev energy region, Richard D. Albert—925
Precise determination of nuclear reaction energies and measurements of resonance widths, R. O. Bondelid and C. A. Kennedy—1601
Radiative capture of protons by Be^9, W. E. Meyerhof, N. W. Tanner, and C. M. Hudson—1227
Resonance detection of neutron energy groups from $Mn^{55}(p,n)Fe^{55}$ reactions, L. L. Lee, Jr., and F. P. Mooring—969
Spallation of Bi by 380-Mev protons, E. T. Hunter and J. M. Miller—1053

Nuclear Scattering (see **Scattering**)

Nuclear Spectra (see also **Nuclear Reactions; Radioactivity**)
α-decay barrier penetrabilities with exponential nuclear potential: odd-mass nuclei, John O. Rasmussen—1675
Angular correlation measurements in O^{15}, B. Povh and D. F. Hebbard—608
β-decay energy of T, Fred T. Porter—450
β decay of Bk^{250} and Bk^{249}, Susanne E. Vandenbosch, Herbert Diamond, Ruth K. Sjoblom, and Paul R. Fields—115
Circular polarization of γ radiation following allowed β transitions, R. M. Steffen—980
Conversion electron angular correlations: general K-shell formulation and threshold limit, Robert C. Young—577
Decay of $_{64}Gd^{161}$ (3.73 min), L. C. Schmid, S. B. Burson, and J. M. Cork—174
Decay of $_{60}Nd^{151}$ (12 min), L. C. Schmid and S. B. Burson—178

Decay of short-lived Ba and La fission products, R. P. Schuman, E. H. Turk, and R. L. Heath—185
Decay of $_{62}Sm^{155}$ (23.5 min), L. C. Schmid and S. B. Burson—447
Decay of $_{50}Sn^{113}$ (112 days) and $_{49}In^{113m}$ (1.73 hr), S. B. Burson, H. A. Grench, and L. C. Schmid—188
Decay schemes of isomers of Tc^{95} and Tc^{97}, John P. Unik and John O. Rasmussen—1687
Energy levels in Na^{23} from $Ne^{22}(p,\gamma)Na^{23}$ reaction, J. J. Singh, V. W. Davis, and R. W. Krone—170
Excitation function for $V^{51}(\gamma,\alpha)Sc^{47}$ reaction, Palmer Dyal and John P. Hummel—1264
γ-γ angular correlation measurements of thermal neutron capture γ-rays in Mg, Si, P, and S, G. Manning and G. A. Bartholomew—401
γ rays from $Si^{29}+p$, J. J. Singh—445
He^3- and He^4-induced Coulomb excitation, D. A. Bromley, J. A. Kuehner, and E. Almqvist—586
Isomeric state of Pt^{199}, Morris A. Wahlgren and W. Wayne Meinke—191
K^{43} decay, N. Benczer-Koller, A. Schwarzschild, and C. S. Wu—108
Levels in Zr^{90}: experimental, S. Bjørnholm, O. B. Nielsen, and R. K. Sheline—1613
Levels in Zr^{90}: theoretical, B. F. Bayman, A. S. Reiner, and R. K. Sheline—1627
Low-energy capture γ rays of Eu^{152} and Eu^{154}, Eugene T. Patronis, Jr., and Harvey Marshak—1287
New Tb isotope Tb^{152}, Kenneth S. Toth, Kenneth T. Faler, and John O. Rasmussen—158
Nuclear spectroscopic studies of neutron-deficient isotopes in rare earth region, Kenneth S. Toth and John O. Rasmussen—150
Nuclear states in RaE β-decay, Neal Newby, Jr., and E. J. Konopinski—434
Pm^{144} decay, Kenneth S. Toth and O. B. Nielsen—1004
Radiative capture of protons by Be^9, W. E. Meyerhof, N. W. Tanner, and C. M. Hudson—1227
Resonance detection of neutron energy groups from $Mn^{55}(p,n)Fe^{55}$ reactions, L. L. Lee, Jr., and F. P. Mooring—969
Resonant absorption by 9.17-Mev level in N^{14}, S. S. Hanna and Luise Meyer-Schützmeister—986
Scattering of protons from He and level parameters in Li^5, Philip D. Miller and G. C. Phillips—1778(E)
708-kev γ-ray in P^{30}, J. J. Singh—1015
Tb^{156} (5-day) decay, Shimon Ofer—412
Theoretical studies of α decay of U^{233}, R. R. Chasman and J. O. Rasmussen—1257

Nuclear Structure Theory (see also **Nuclear Reactions; Nuclear Spectra**)
α-decay barrier penetrabilities with exponential nuclear potential: odd-mass nuclei, John O. Rasmussen—1675
Energy levels in bounded isotropic harmonic oscillator potential and nuclear shell structure, S. Sengupta and S. Ghosh—1681
Inelastic diffraction scattering, John S. Blair—928
Levels in Zr^{90}: theoretical, B. F. Bayman, A. S. Reiner, and R. K. Sheline—1627
Magnetic moments of strongly deformed odd-odd nuclei, W. M. Hooke—453
Mirror nuclei radii utilizing self-energy term and non-uniform charge distributions, R. D. Cherry—1243
Moment of inertia of interacting many-body fermion systems, R. D. Amado and K. A. Brueckner—778
Nuclear band structure in Sc^{41}, R. H. Davis—1679
Nuclear states in RaE β-decay, Neal Newby, Jr., and E. J. Konopinski—434
Optical-model analysis of excitation function data and theoretical reaction cross sections for α particles, George Igo—1665
(p,n) cross section and proton optical model parameters in 4- to 5.5-Mev energy region, Richard D. Albert—925
Shell model theory of inelastic scattering on Be^9, William T. Pinkston—963
Spin-orbit contributions to H^3-He^3 magnetic moments, Jay M. Berger—384
Theoretical studies of α decay of U^{233}, R. R. Chasman and J. O. Rasmussen—1257

Optical Instruments (see **Methods and Instruments**)
Optical Properties (see also **Luminescence**)
Aggregation of F centers in KI, D. H. Goode and P. A. Schroeder—1426
Band structure of noble metal alloys: optical absorption in α-brasses at 4.2°K, M. A. Biondi and J. A. Rayne—1522
Effects of MnO and CoO on 0.24-ev NiO absorption line, R. Newman and R. M. Chrenko—882
Infrared absorption from $\mathbf{L}\cdot\mathbf{S}$ splittings in Co^{3+} salts, R. Newman and R. M. Chrenko—1147
Nitrogen, a major impurity in common type I diamonds, W. Kaiser and W. L. Bond—857
Optical properties of activated and unactivated hexagonal ZnS single crystals, S. P. Keller and G. D. Pettit—526
Polarization processes in partially illuminated photoconducting insulators, M. Y. Ben Sira, B. Pratt, E. Harnik, and A. Many—554
Recombination processes in p-type InSb, R. N. Zitter, A. J. Strauss, and A. E. Attard—266
Spin relaxation of optically aligned Rb vapor, W. Franzen—850
Structure in energy distribution of photoelectrons from K_3Sb and Cs_3Sb, E. A. Taft and H. R. Philipp—1583
Studies of semiconducting properties of compound CsAu, W. E. Spicer, A. H. Sommer, and J. G. White—57

Pair Production (see **Electrons and Positrons**)
Parity (see **Elementary Particle Interactions; Field Theory; Nuclear Spectra**)

Protons (see **Elementary Particle Interactions**)

Quantum Electrodynamics (see also **Field Theory**)
Dispersion relation for nonlinear vacuum polarization effects, J. G. Gilson—752
Dispersive effects in electron-nucleus interactions, Nicholas A. Krall and E. E. Salpeter—457
Dynamics of system of spin 1 particles, K. T. Mahanthappa, P. M. Mathews, and Jayaseetha Rau—478
Euclidean quantum electrodynamics, Julian Schwinger—721
Induced and spontaneous emission in coherent field. II, I. R. Senitzky—227
Structure theorem for photon propagator, Herbert M. Fried—220
Quantum Mechanics
New quantum-mechanical representation, E. C. McIrvine and A. W. Overhauser—1531
Proposed direct test of uncertainty principle, P. R. Ryason—784
Quantum-mechanical three-body problem, Leonard Eyges—1643
Significance of electromagnetic potentials in quantum theory, Y. Aharonov and D. Bohm—485
Wave function for free electron. I. Coulomb potential, R. G. Breene, Jr., and Maria C. Nardone—93
Quenching of Radiation (see **Radiation**)

Radar (see **Methods and Instruments; Radiation**)
Radiation (see also **Gamma Rays; Range and Energy Loss; X-Rays**)
Absorption of 1-Bev photons, E. Malamud—687
Induced and spontaneous emission in coherent field. II, I. R. Senitzky—227
Recoil momentum distribution in electron pair production, K. S. Suh and H. A. Bethe—672
Semiclassical theory of internal Rayleigh scattering, A. M. Cormack—619
Radio Waves (see **Radiation**)
Radioactivity (see also **Nuclear Spectra**)
α-decay barrier penetrabilities with exponential nuclear potential: odd-mass nuclei, John O. Rasmussen—1675
New Tb isotope Tb^{152}, Kenneth S. Toth, Kenneth T. Faler, and John O. Rasmussen—158
Nuclear states in RaE β-decay, Neal Newby, Jr., and E. J. Konopinski—434
Theoretical studies of α decay of U^{233}, R. R. Chasman and J. O. Rasmussen—1257
Raman Spectra (see **Molecular Structure and Spectra**)
Range and Energy Loss (see also **Scattering**)
Binding effect corrections in energy-loss distribution functions for charged particles passing through thin absorbers, Walter Rosenzweig—1683
Fluorescent response of CsI crystals to heavy ions, A. R. Quinton, C. E. Anderson, and W. J. Knox—886
Most probable energy loss of fast electrons, H. E. Hall, A. O. Hanson, and D. Jamnik—633
Origin of characteristic electron energy losses in Al, C. J. Powell and J. B. Swan—869
Range-energy relations for protons in Be, C, Al, Cu, Pb, and air, R. M. Sternheimer—137
Recombination (see **Molecular Structure and Spectra**)
Rectifiers (see **Electrical Conductivity and Resistance; Semiconductors**)
Relativity and Gravitation
General relativity and particle dynamics, L. H. Thomas—1778(E)
Geometry of gravitation and electromagnetism, Louis Witten—206
Nonlinear effects of gravitational radiation, Asher Peres and Nathan Rosen—1085
Reciprocal static metrics and scalar fields in general theory of relativity, H. A. Buchdahl—1325
Spherical gravitational waves, John Boardman and Peter G. Bergmann—1318
Structure of electromagnetic field, Bruno Bertotti—742
Time retardation in static and stationary spherical and elliptic spaces, John Kronsbein and Erich A. Farber—763
Resistance, Electrical (see **Electrical Conductivity and Resistance**)
Resonance Radiation (see **Radiation**)

Scattering, General (see also **Diffraction; Elementary Particle Interactions; Nuclear Reactions; Range and Energy Loss**)
Classical theory of electronic and ionic inelastic collisions, Michał Gryziński—374
Collision-induced spin flip of H atoms, Oldwig von Roos—911
Elastic nucleon-deuteron scattering in soluble model as test of impulse approximation, Thomas Fulton and Philip Schwed—973
Elastic scattering of N^{14} by Be^9, M. L. Halbert and A. Zucker—1635
Formal theory of scattering in quantum field theory, Smio Tani—711
Inelastic diffraction scattering, John S. Blair—928
Shell model theory of inelastic scattering on Be^9, William T. Pinkston—963
Theory of multiple scattering: second Born approximation and correction to Molière's work, B. P. Nigam, M. K. Sundaresan, and Ta-You Wu—491
Scattering of α Particles and He^3 (see also **Nuclear Reactions Induced by α Particles and He^3**)
Measurement of spin polarization by nuclear scattering, G. C. Phillips and P. D. Miller—1268
Resonance electron exchange in large-angle scattering of He^+ on He at kev energies, F. P. Ziemba and A. Russek—922
Shell model theory of inelastic scattering on Be^9, William T. Pinkston—963
Scattering of Atoms and Molecules (see **Atomic and Molecular Beams**)
Scattering of Deuterons and Tritons (see also **Nuclear Reactions Induced by Deuterons and Tritons**)
Diffusion measurements in system Cu-Au by elastic scattering, Robert F. Sippel—1441
Scattering of Electrons and Positrons (see also **Electrons and Positrons**)
Classical theory of electronic and ionic inelastic collisions, Michał Gryziński—374
Dispersive effects in electron-nucleus interactions, Nicholas A. Krall and E. E. Salpeter—457
Inelastic electron-deuteron scattering cross sections at high energies, Loyal Durand, III—1020
Inelastic scattering of 500-Mev electrons from Li^6 and Li^7, Ulrich Meyer-Berkhout—1300
Mirror nuclei radii utilizing self-energy term and nonuniform charge distributions, R. D. Cherry—1243
Most probable energy loss of fast electrons, H. E. Hall, A. O. Hanson, and D. Jamnik—633
Scattering of Mesons and Hyperons (see also **Mesons and Hyperons; Nuclear Reactions Induced by Mesons and Hyperons**)
Charge exchange scattering of 128-Mev negative pions on hydrogen, E. Garwin, W. Kernan, C. O. Kim, and C. M. York—1295
K^+-deuteron scattering in impulse approximation, Erasmo M. Ferreira—1727

Scattering of Neutrons (see also **Nuclear Reactions Induced by Neutrons**)
Angular distributions of neutrons inelastically scattered from Na, E. N. Shipley, G. E. Owen, and L. Madansky—122
Back-angle elastic scattering of 14.6-Mev neutrons from Al, Cu, and Zr, John D. Anderson, Calvin C. Gardner, John W. McClure, M. P. Nakada, and Calvin Wong—1010
Elastic nucleon-deuteron scattering in soluble model as rest of impulse approximation, Thomas Fulton and Philip Schwed—973
Elastic scattering of 14-Mev neutrons by Al, S, Ti, and C, Claude St. Pierre, M. K. Machwe, and Paul Lorrain—999
Scattering of high-energy neutrons by He^4, T. W. Bonner, F. W. Prosser, Jr., and J. Slattery—398
Scattering of 2- to 4-Mev polarized neutrons by carbon, W. P. Bucher, W. B. Beverly, G. C. Cobb, and F. L. Herefore—961
Scattering of Protons (see also **Nuclear Reactions Induced by Protons**)
Diffusion measurements in system Cu-Au by elastic scattering, Robert F. Sippel—1441
Elastic scattering and capture of protons by C^{14}, D. F. Hebbard and D. N. F. Dunbar—624
Elastic scattering and polarization of protons by He at 147 and 66 Mev, A. M. Cormack, J. N. Palmieri, N. F. Ramsey, and Richard Wilson—599
Elastic scattering of protons by V, Cr, Fe, and Co, C. A. Preskitt and W. P. Alford—389
Elastic scattering of 20.35-Mev protons by Zn^{64}, Zn^{66}, and Zn^{68}, R. W. Boom and J. Reginald Richardson—1700
Measurement of spin polarization by nuclear scattering, G. C. Phillips and P. D. Miller—1268
Nuclear band structure in Sc^{41}, R. H. Davis—1679
p-p scattering at 90° from 28 to 68 Mev, Lawrence H. Johnston and Yung Su Tsai—1293
Scattering of protons from He and level parameters in Li^5, Philip D. Miller and G. C. Phillips—1778(E)
Scattering of Radiation (see **Gamma Rays; Radiation; X-Rays**)
Scintillation Counters (see **Methods and Instruments**)
Secondary Emission (see **Electrical Properties**)
Semiconductors
Crystalline imperfections and $1/f$ noise, James J. Brophy—1122
Effective mass of electrons in GaAs, L. C. Barcus, A. Perlmutter, and J. Callaway—1778(E)
Electron damage thresholds in InSb, F. H. Eisen and P. W. Bickel—345
Electron irradiation of InAs, L. W. Aukerman—1133
Electron irradiation of InSb, L. W. Aukerman—1125
Hall effect and impurity levels in P-doped Si, Donald Long and John Myers—1119
Ionized-impurity scattering mobility of electrons in Si, Donald Long and John Myers—1107
K-absorption edge of Se, Richard D. Deslattes and Hillery S. deBen—71
Magnetic susceptibility of InSb, R. Bowers and Y. Yafet—1165
Magnetoresistance in multivalley model with ⟨110⟩-ellipsoids of general shape, Robert S. Allgaier—1185
Many-particle approach to one-electron problem in insulators and semiconductors, Abraham Klein—1136
Metal to semiconductor contacts. Injection or extraction for either direction of current flow, N. J. Harrick—876
Nernst and Ettinghausen effects in effects in Ge between 300 and 700°K, Herbert Mette, Wolfgang W. Gärtner, and Claire Loscoe—537
Photoconductivity of GaSe crystals, Richard H. Bube and Edward L. Lind—1159
Piezoresistance of n-type Ge, H. Fritzsche—336
Recombination processes in p-type InSb, R. N. Zitter, A. J. Strauss, and A. E. Attard—266
Recombination properties of Ni in Ge, G. K. Wertheim—37
Studies of semiconducting properties of compound CsAu, W. E. Spicer, A. H. Sommer, and J. G. White—57
Temperature-dependent defect production in bombardment of semiconductors, G. K. Wertheim—568
Thermal conductivity of InSb at low temperatures, Eugenie V. Mielczarek and H. P. R. Frederikse—888
Shock Waves (see **Fluid Dynamics**)
Solid State (see **Crystalline State**)
Solutions (see **Liquids**)
Sound (see **Acoustics**)
Spallation (see **Nuclear Reactions**)
Spark Discharge (see **Electrical Discharges**)
Specific Heat (see **Thermal Properties**)
Spectra, Atomic (see **Atomic Structure and Spectra**)
Spectra, General
Frequency shifts in hyperfine splitting of alkalis caused by foreign gases, H. Margenau, P. Fontana, and L. Klein—87
Spectra, Molecular (see **Molecular Structure and Spectra**)
Spectra, Nuclear (see **Nuclear Spectra**)
Spectroscopy Technique (see **Methods and Instruments**)
Spinor Fields (see **Field Theory**)
Standards (see **Constants, Standards, Units**)
Stark Effect (see **Atomic Structure and Spectra**)
Statistical Mechanics and Thermodynamics
Adiabatic invariants of periodic classical systems, C. S. Gardner—791
Approach to Boltzmann equilibrium of nuclear spins in quadrupolar solid, Walter I. Goldburg—48
Collective excitations in theory of superconductivity, G. Rickayzen—795
Cooling by adiabatic magnetization, W. P. Wolf—1196
Conditions for equilibrium at negative absolute temperatures, Bernard D. Coleman and Walter Noll—262
Correlation function method for transport phenomena, Hazime Mori—298
Electric field distributions in ionized gas, Michel Baranger and Bernard Mozer—521
Energy levels of Bose-Einstein system of particles with attractive interactions, Kerson Huang—765
Fourth virial coefficient for square well potential, Shigetoshi Katsura—1417
Fusion curves of four group VIII metals to 100 000 atmospheres, H. M. Strong and F. P. Bundy—278
Ground state of Bose system of hard spheres, Tai Tsun Wu—1390
Linked-diagram expansions for quantum statistical mechanics, A. E. Glassgold, Warren Heckrotte, and Kenneth M. Watson—1374
Moment of inertia of interacting many-body fermion systems, R. D. Amado and K. A. Brueckner—778
Negative temperatures, P. T. Landsberg—518
Pair distribution function and two-body propagator, S. Fujita—1335
Phase diagram of Rb to 150 000 kg/cm² and 400°C, F. P. Bundy—274
Quantum-mechanical approach to thermal transport phenomena in metals, E. C. McIrvine—1537
Remark on recurrence times, M. Kac—1
Statistical mechanical theory of random ferromagnetic system, R. Brout—824
Statistical mechanics of steady state, James McLennan, Jr.—1405
Superconductivity of charged ideal 2-dimensional Bose gas, R. M. May—254
Theory of many-particle systems. I, Paul C. Martin and Julian Schwinger—1342

Statistical Mechanics and Thermodynamics (Continued)
Third law of thermodynamics, Gottfried Falk—249
Vibration frequency spectra of disordered lattices. I. Moments of spectra for disordered linear chains, C. Domb, A. A. Maradudin, E. W. Montroll, and G. H. Weiss—18; II. Spectra of disordered one-dimensional lattices, C. Domb, A. A. Maradudin, E. W. Montroll, and G. H. Weiss—24
Weak-coupling expansion for ground-state energy of many-boson system, M. Girardeau—1090
Statistical Methods (see **Mathematical Methods**)
Strange Particles (see **Elementary Particle Interactions; Mesons and Hyperons**)
Superconductivity
Collective excitations in theory of superconductivity, G. Rickayzen—795
Electromagnetic properties of superconductors, K. K. Gupta and V. S. Mathur—75
Ferromagnetic solutes in superconductors, Bernd Matthias, Vera B. Compton, Harry Suhl, and Ernst Corenzwit—1597
Meissner-Ochsenfeld effect in Bogoljubov theory, R. M. May and M. R. Schafroth—1446
Superconductivity of charged ideal 2-dimensional Bose gas, R. M. May—254
Weak-coupling expansion for ground-state energy of many-boson system, M. Girardeau—1090
Supersonics (see **Fluid Dynamics**)

Thermal Conductivity (see **Thermal Properties**)
Thermal Diffusion (see **Diffusion**)
Thermal Expansion (see **Thermal Properties**)
Thermal Properties
Calculation of specific heat of some alkali halides, Clark Oliphint—296
Energy dependence of recovery in irradiated Cu, J. W. Corbett and R. M. Walker—67
Expansion coefficient and entropy of liquid He^3 under pressure below 1°K, D. F. Brewer and J. G. Daunt—843
Fusion curves of four group VIII metals to 100 000 atmospheres, H. M. Strong and F. P. Bundy—278
High-temperature thermal conductivity of insulating crystals: relationship to melting point, Robert W. Keyes—564
Low-temperature specific heat of liquid He^3 near saturated vapor pressure and at higher pressures, D. F. Brewer, J. G. Daunt, and A. K. Sreedhar—836
Low-temperature transport properties of Cu and its dilute alloys: pure Cu, annealed and cold-drawn, Robert L. Powell, Hans M. Roder, and William J. Hall—314
Properties of alkali halide crystals at low temperatures, T. H. K. Barron and J. A. Morrison—1439
Quantum-mechanical approach to thermal transport phenomena in metals, B. C. McIrvine—1537
Thermal conductivity of InSb at low temperatures, Eugenie V. Mielczarek and H. P. R. Frederikse—888
Thermal expansion coefficients of MnF_2, D. F. Gibbons—1194
Thermal Radiation (see **Radiation**)
Thermionic Emission (see **Electrical Properties**)
Thermodynamics (see **Statistical Mechanics and Thermodynamics**)
Thermoelectric Effect (see **Electrical Properties; Semiconductors**)

Cosmic Radiation (see also **Mesons and Hyperons**)
Cosmic-ray neutron energy spectrum, Wilmot N. Hess, H. Wade Patterson, Roger Wallace, and Edward L. Chupp—445
Direct pair production by muons, Byron P. Roe and Seinosuke Ozaki—1022
Directional properties of extensive air shower array, C. B. A. McCusker, D. E. Page, and R. A. Reid—181
Heavy nuclei in primary cosmic radiation at Prince Albert, Canada. I. Carbon, nitrogen, and oxygen, H. Aizu, Y. Fujimoto, S. Hasegawa, M. Koshiba, I. Mito, J. Nishimura, K. Yokoi, and Marcel Schein—436
High-altitude neutron intensity diurnal variation, Robert C. Haymes—1231
Measurement of primary directions in extensive air showers, C. B. A. McCusker—177
Multiple meson production in nucleon-nucleon interactions at energies of 10^{12} ev, Marcel Schein, D. M. Haskin, E. Lohrmann, and M. W. Teucher—1238
Primary cosmic-ray intensity near solar maximum, Frank B. McDonald—462
Sea-level cosmic-ray mass spectrum in interval $30m_e$–$2000m_e$, G. G. Fazio and M. Widgoff—1263
Search for anomalous lifetime values in sea-level cosmic radiation, G. G. Fazio and D. M. Ritson—1267
Sudden increase of cosmic-ray intensity, Hugh R. Anderson—461
Cosmology (see **Astrophysics; Relativity and Gravitation**)
Coulomb Excitation (see **Nuclear Reactions; Nuclear Spectra**)
Critical Potentials (see **Atomic Structure and Spectra; Molecular Structure and Spectra**)
Cross Section (see **Electrons and Positrons; Nuclear Reactions; Radiation; Scattering**)
Crystal Counters (see **Methods and Instruments**)
Crystalline State (see also **Electrical Properties; Imperfections in Solids; Magnetic Properties; Semiconductors; etc.**)
Calculation of cohesive energy of metallic Fe, Frank Stern—1399
Calculation of order parameters in binary alloy by Monte Carlo method, Lloyd D. Fosdick—565
Classical spin-configuration stability in presence of competing exchange forces, T. A. Kaplan—888
Correlation energy in model semiconductor, J. Callaway—1368
Crystal potential and energy bands of semiconductors. I. Self-consistent calculations for diamond, Leonard Kleinman and James C. Phillips—880
Dendritic growth of Ge crystals, A. I. Bennett and R. L. Longini—53
Deviations from Matthiessen's rule in Al, Sn, and Cu alloys, P. Alley and B. Serin—334
Effect of lattice vibrational spectrum on intrinsic electrical and thermal resistivity of metals, A. Meyer—339
Effect of spin-orbit coupling on energy levels in 6*d* band for actinide metals, Guy W. Lehman—846
Effects of electron correlation on optical properties of metals, P. A. Wolff—544
Exciton spectrum of CdS, D. G. Thomas and J. J. Hopfield—573
Exciton states in ionic crystals, R. S. Knox and N. Inchauspé—1093
Exclusion factors in transport theory, E. I. Blount—1365
Fermi surface in Al, Walter A. Harrison—555
Formation of interstitials in alkali halides by ionizing radiation, R. E. Howard and R. Smoluchowski—314
Formation of positronium in electron gas, Joseph Callaway—1140
Influence of elastic anisotropy on dislocation contribution to elastic constants, J. S. Koehler and G. deWit—1121
Interaction of dislocations with applied stress in anisotropic crystals, G. deWit and J. S. Koehler—1113
Isotope effect in Bardeen-Cooper-Schrieffer and Bogoliubov theories of superconductivity, James C. Swihart—45
Low-temperature annealing of irradiation-induced effects in LiF, D. A. Wiegand and R. Smoluchowski—1069
Neutron study of crystal and magnetic structures of $MnFe_{2-t}Cr_tO_4$, Stanley J. Pickart and Robert Nathans—317
New method for calculating wave functions in crystals and molecules, James C. Phillips and Leonard Kleinman—287
Optical detection of vacancies created by high-energy radiation in NaCl, H. W. Etzel and J. G. Allard—885
Origin of characteristic electron energy losses in Mg, C. J. Powell and J. B. Swan—81
Paramagnetic resonance and crystal field in two Ni-chelate crystals, Martin Peter—1432
Paramagnetic resonance of *S*-state ions in SrCl, W. Low and U. Rosenberger—621
Self-energy of helical dislocation, Roland deWit—592
Slow electrons in polar crystals: Self-energy, mass, and mobility, T. D. Schultz—526

Solutions of secular determinant on Brillouin zone faces for fcc lattice vibrations, W. C. Overton, Jr.—851
Spatial diffusion of spin energy, Alfred G. Redfield—315
Test of spin Hamiltonian for Fe^{3+} in $SrTiO_3$, Sol Aisenberg, H. Statz, and G. F. Koster—811
Theoretical model for tetragonal-to-cubic phase transformations in transition metal spinels, Peter J. Wojtowicz—32
Theory of displacement cascades in compounds, E. M. Baroody—1418
Theory of ferromagnetic resonance in rare earth garnets. II. Linewidths, P. G. de Gennes, C. Kittel, and A. M. Portis—323
Theory of nuclear spin relaxation in superconductors, L. C. Hebel—79
Theory of surface modes of vibration in two- and three-dimensional crystal lattices, Richard F. Wallis—302
Thermoluminescence of x-ray colored NaCl crystals, A. Halperin, N. Kristianpoller, and A. Ben-Zvi—1081
Ultraviolet absorption of alkali halides, J. E. Eby, K. J. Teegarden, and D. B. Dutton—1099
Vibrational spectrum of vanadium, D. N. Singh and W. A. Bowers—279
X-ray expansion and coloration of undoped and impurity-doped NaCl crystals, Herbert Rabin—1381

Diamagnetism (see **Magnetic Properties**)
Dielectrics and Dielectric Properties
Ac impedance measurements on insulated CdS crystals, Hartmut Kallmann, Bernard Kramer, and Grace Marmor Spruch—628
Dependence of forbidden gap and luminescence ground-state energies of (ZnCd)S:Ag on concentration of CdS, Gordon E. Gross—1478
Exciton states in ionic crystals, R. S. Knox and N. Inchauspé—1093
Optical anisotropy of tetragonal $BaTiO_3$, Wataru Kinase, Jinzo Kobayashi, and Noboru Yamada—348
Polarized light transmission of $BaTiO_3$ single crystals, R. C. Casella and S. P. Keller—1469
Radiation produced by electron beam passing through dielectric medium, Jacob Neufeld—785
Slow electrons in polar crystals: self-energy, mass, and mobility, T. D. Schultz—526
Switching mechanism in triglycine sulfate and other ferroelectrics, E. Fatuzzo and W. J. Merz—61
X-ray induced electrical polarization in glass, T. M. Proctor—1436
Diffraction (see also **Scattering**)
Diffraction of thermal waves in liquid He II by spherical mirror, J. Fajans—1066
Neutron study of crystal and magnetic structures of $MnFe_{2-t}Cr_tO_4$, Stanley J. Pickart and Robert Nathans—317
Self-adjustment of internal radiation field to compensate for linearly varying d spacing in x-ray diffraction, H. Cole and G. E. Brock—868
Diffusion
Correlation effects in impurity diffusion, John R. Manning—819
Tracer diffusion in chemical concentration gradient in Ag-Cd, John R. Manning—69
Discharge of Electricity in Gases (see **Electrical Discharges**)
Disintegration and Excitation of Nucleus (see **Nuclear Reactions**)
Dynamics (see **Mechanics**)

Elasticity and Plasticity
Influence of elastic anisotropy on dislocation contribution to elastic constants, J. S. Koehler and G. deWit—1121
Interaction of dislocations with applied stress in anisotropic crystals, G. deWit and J. S. Koehler—1113
Theory of surface modes of vibration in two- and three-dimensional crystal lattices, Richard F. Wallis—302
Electrical Breakdown (see **Dielectrics and Dielectric Properties; Electrical Discharges**)
Electrical Conductivity and Resistance (see also **Electrical Properties; Semiconductors; Superconductors**)
Ac impedance measurements on insulated CdS crystals, Hartmut Kallmann, Bernard Kramer, and Grace Marmor Spruch—628
Conductivity of warm plasma, Lyman Mower—16
Depletion-layer photoeffects in semiconductors, Wolfgang W. Gärtner—84
Deviations from Matthiessen's rule in Al, Sn, and Cu alloys, P. Alley and B. Serin—334
Effect of lattice vibrational spectrum on intrinsic electrical and thermal resistivity in metals, A. Meyer—339
Effects of polarized light on photocurrents and photovoltages in ZnS, G. Cheroff, R. C. Enck, and S. P. Keller—1091
Electrical resistivity of Y single crystals, P. M. Hall, S. Legvold, and F. H. Spedding—1446
Frequency dependence of surface resistance of superconducting Sn in mm wavelength region, R. Kaplan, A. H. Nethercot, Jr., and H. A. Boorse—270
Nordheim's theory of resistivity of alloys, George L. Hall—604
Photoconductive and photoelectromagnetic lifetime determination in presence of trapping. I. Small signals, A. Amith—793
Resistance transitions in superconducting Ta, D. P. Seraphim and R. A. Connell—606
Electrical Discharges
Absorption and dispersion of microwaves in flames, Jürgen Schneider and F. W. Hofmann—244
Buildup of discharge of argon, M. Menes—481
Conductivity of warm plasma, Lyman Mower—16
Effect of simultaneous Doppler and collision broadening and of hfs on imprisonment of resonance radiation, P. J. Walsh—511
Propagation of electromagnetic waves in multistream medium at gyromagnetic resonance, Jacob Neufeld—19; 1620(E)
Theoretical analysis of buildup of current in transient Townsend discharge, Yasunori Miyoshi—1620(E)
Transport phenomena in slightly ionized gases: low electric fields, Mahendra Singh Sodha—486
Electrical Properties (see also **Dielectrics and Dielectric Properties; Electrical Conductivity and Resistance; Semiconductors; Superconductors**)
Anomalous thermionic emission of UC and other compounds involving rare earth and transition metals, E. A. Kmetko—895
Bremsstrahlung and photoelectric effect as inverse processes, Kirk W. McVoy and U. Fano—1168
Electron emission from Si p-n junctions, B. Senitzky—874
Electronic surface states and cleaned Ge surface, Paul Handler and William M. Portnoy—516
Fermi surface in Al, Walter A. Harrison—555
High-frequency limit of bremsstrahlung in Sauter approximation, U. Fano—1156
Interference of orbital and spin currents in bremsstrahlung and photoelectric effect, U. Fano, K. W. McVoy, and James R. Albers—1159
New parallel photoelectromagnetic effect, A. Amith—330
Sauter theory of photoelectric effect, U. Fano, K. W. McVoy, and James R. Albers—1147
Switching mechanism in triglycine sulfate and other ferroelectrics, E. Fatuzzo and W. J. Merz—61

Electrical Properties (Continued)
Thermoelectric power of cold-rolled pure Cu, R. H. Kropschot and F. J. Blatt—617
Work function of Fe surfaces produced by cleavage in vacuum, Ralph E. Simon—613
Electrodynamics (see **Electromagnetic Theory and Electrodynamics**)
Electroluminescence (see **Luminescence**)
Electrolysis (see **Chemical Effects and Properties**)
Electromagnetic Theory and Electrodynamics (see also **Microwaves**)
mm wave absorption in superconducting Al. II. Calculation of skin depth, Manfred A. Biondi and M. P. Garfunkel—862
Propagation of electromagnetic waves in multistream medium at gyromagnetic resonance, Jacob Neufeld—19; 1620(E)
Radiation produced by electron beam passing through dielectric medium, Jacob Neufeld—785
Spectral and angular distribution of cyclotron radiation emitted by colliding particles, Ludwig Oster—474
Uniform electromagnetic field in theory of general relativity, B. Bertotti—1331
Electron Diffraction (see **Diffraction; Scattering of Electrons and Positrons**)
Electron Optics (see **Electromagnetic Theory and Electrodynamics**)
Electronic Tubes (see **Methods and Instruments**)
Electrons and Positrons (see also **Electromagnetic Theory and Electrodynamics; Elementary Particle Interactions; Scattering of Electrons and Positrons**)
Double scattering of electrons with dipole moment, M. H. Zaidi—241
Formation of positronium in electron gas, Joseph Callaway—1140
Electrons, Mobility (see **Ions and Electrons, Mobility**)
Electrons, Scattering of (see **Scattering of Electrons and Positrons**)
Electrons, Secondary (see **Electrical Properties**)
Electrons, Thermionic (see **Electrical Properties**)
Electro-Optical Effects (see **Optical Properties**)
Electrostriction (see **Dielectrics and Dielectric Properties**)
Elementary Particle Interactions, General
Evaluation of dispersion relations, R. Blankenbecler and S. Gartenhaus—1297
Green's functions for elementary particles, Hiroshi Ezawa and Hiroomi Umezawa—463
Plausibility of nonlocal optical model, Y. C. Tang, R. H. Lemmer, P. J. Wyatt, and A. E. S. Green—402
Two proposed experiments for detection of Dirac monopole, Robert Katz and Darrell R. Parnell—236
Elementary Particle Interactions, Electromagnetic
Contribution of nucleon currents to radiative muon capture by proton, G. K. Manacher and L. Wolfenstein—782
Direct pair production by muons, Byron P. Roe and Seinosuke Ozaki—1022
Electromagnetic corrections to isotopic spin conservation, S. Weinberg and S. B. Treiman—465
Electromagnetic interaction of neutral K meson, G. Feinberg—1620(E)
Nucleon correlation effects in high-energy electron scattering, W. E. Drummond—183
Photoproduction of π mesons, S. Gartenhaus and R. Blankenbecler—1305
Two proposed experiments for detection of Dirac monopole, Robert Katz and Darrell R. Parnell—236
Elementary Particle Interactions, Strong
Analytic properties of partial amplitudes in meson-nucleon scattering, S. W. MacDowell—774
Conservation of parity in strong interactions, R. Haas, L. B. Leipuner, and R. K. Adair—1221
Determination of pion-nucleon coupling constant from n-p scattering angular distribution, Peter Cziffra and Michael J. Moravcsik—226
Dispersion analysis of possible parity nonconservation in low-energy pion-nucleon scattering, S. Fubini and D. Walecka—194
Elastic π^+-p and p-p scattering at 1.23 Bev/c, L. O. Roellig and D. A. Glaser—1001
Electromagnetic corrections to isotopic spin conservation, S. Weinberg and S. B. Treiman—465
Evaluation of dispersion relations, R. Blankenbecler and S. Gartenhaus—1297
Green's functions for elementary particles, Hiroshi Ezawa and Hiroomi Umezawa—463
Interaction of static nucleons, R. E. Cutkosky—1272
K^+ nucleon scattering in Tamm-Dancoff approximation, Grzegorz Bialkowski and Andrezej Jurewicz—1269
Meson-nucleon scattering and nuclear forces, Victor Weisskopf—1615
Method for determination of strange particle parities and coupling constants, John G. Taylor—768
Modified analysis of nucleon-nucleon scattering. II. Completed analysis of p-p scattering at 310 Mev, Malcolm H. MacGregor, Michael J. Moravscik, and Henry P. Stapp—1248
Multiple meson production in nucleon-nucleon interactions at energies of 10^{13} ev, Marcel Schein, D. M. Haskin, E. Lohrmann, and M. W. Teucher—1238
Nucleon correlation effects in high-energy electron scattering, W. E. Drummond—183
Panofsky ratio for negative pions absorbed in hydrogen, E. L. Koller and A. M. Sachs—760
Phenomenological nuclear interaction derived from binding energies, R. Thieberger—713
π^+-p interactions at 500 Mev, William J. Willis—753
p-p polarization at 16 Mev, William A. Blanpied—738
p-p scattering at 10 Mev, L. H. Johnston and D. E. Young—989
Scattering of negative mesons by H at 130 and 152 Mev, U. E. Kruse and R. C. Arnold—1008
Scattering of 3.7–25 Mev positive pions by hydrogen, G. E. Fischer and E. W. Jenkins—749
Elementary Particle Interactions, Weak
Contribution of nucleon currents to radiative muon capture by proton, G. K. Manacher and L. Wolfenstein—782
Decay of charged pion, R. F. Sawyer—231
Determination of β-decay interaction from electron-neutrino angular correlation measurements, J. S. Allen, R. L. Burman, W. B. Hermannsfeldt, P. Stähelin, and T. H. Braid—134
Form factors in $K_{\mu 3}$ and K_{e3} decay, S. MacDowell—1047
Interference effects in neutral K-particle decay, S. B. Treiman and S. Weinberg—239
μ-meson capture in Li^6 leading to ground state of He^6, H. Überall—218
Muon capture by C^{12} and β decay of B^{12}, G. Flamand and K. W. Ford—1591
Pionic decay of light Λ hypernuclei, R. H. Dalitz and L. Liu—1312
Structure of weak interactions and unwanted processes, N. Cabibbo and R. Gatto—1334
Elements (see **Atomic Mass and Abundance**)

Liquids
Luminescence
Dependence of forbidden gap and luminescence ground-state energies of (ZnCd)S:Ag on concentration of CdS, Gordon E. Gross—1478
Efficiency of electroluminescence in ZnS, Gertrude Neumark—1425
Electroluminescence at low voltages, W. A. Thornton—893
Exciton spectrum of CdS, D. G. Thomas and J. J. Hopfield—573
Thermoluminescence of x-ray colored NaCl crystals, A. Halperin, N. Kristianpoller, and A. Ben-Zvi—1081

Magnetic Fields (see **Electromagnetic Theory and Electrodynamics**)
Magnetic Properties
Antiferromagnetic linear chain, L. R. Walker—1089
Classical spin-configuration stability in presence of competing exchange forces, T. A. Kaplan—888
Dependence of geometric magnetic anisotropy in thin Fe films, T. G. Knorr and R. W. Hoffman—1620(E)
Evidence for antiferromagnetism in $CoBr_2 \cdot 6H_2O$, H. Forstat, G. Taylor, and R. D. Spence—897
Interpretation of magnetic properties of Dy, S. H. Liu, D. R. Behrendt, S. Legvold, and R. H. Good, Jr.—1464
Linear antiferromagnetic chain. Sergio Rodriguez—1474
Magnetic properties of hematite single crystals. I. Magnetization isotherms, antiferromagnetic susceptibility, and weak ferromagnetism of a natural crystal, S. T. Lin—1447
Magnetic properties of mixed garnets $(3-x)Y_2O_3 \cdot xGd_2O_3 \cdot 5Fe_2O_3$, Elmer E. Anderson, J. Richard Cunningham, Jr., and G. E. McDuffie—624
Magnetic properties of Mn chromite-aluminates, P. L. Edwards—294
Microwave Faraday rotation in antiferromagnetic MnF_2, A. M. Portis and Dale Teaney—838
Neutron study of crystal and magnetic structures of $MnFe_{2-t}Cr_tO_4$, Stanley J. Pickart and Robert Nathans—317
Nuclear spin-lattice relaxation in metals, A. G. Anderson and A. G. Redfield—583
Optical absorption of CoO and MnO above Néel temperature, G. W. Pratt, Jr., and Roland Coelho—281
Paramagnetic resonance spectra of Cr and Mn in spinel structure, R. Stahl-Brada and W. Low—561
Pseudodipolar anisotropy in cubic ferromagnets at low temperatures, S. H. Charap and P. R. Weiss—1372
Resolution of ambiguity of valence states in spinels containing Mn and Fe spinels, Arthur Miller—1481
Saturation magnetization of Ni films of thickness less than 100 A, C. A. Neugebauer—1441
Spin alignment in superconducting state, P. W. Anderson and H. Suhl—898
Superparamagnetism, nonrandomness, and irradiation effects in Cu-Ni alloys, F. M. Ryan, E. W. Pugh, and R. Smoluchowski—1106
Theoretical model for tetragonal-to-cubic phase transformations in transition metal spinels, Peter J. Wojtowicz—32
Theory of ferromagnetic resonance in rare earth garnets. II. Linewidths, P.-G. de Gennes, C. Kittel, and A. M. Portis—323
Magnetic Resonance (see also **Nuclear Moments and Spin**)
Cd^{111}-Cd^{113} nuclear moment ratio and hyperfine anomaly, M. P. Klein and J. S. Waugh—960
Fine structure in decline of ferromagnetic resonance absorption with increasing power level, Ernst Schlömann—828
Hfs and nuclear moments of Br^{82}, Hugh L. Garvin, Thomas M. Green, Edgar Lipworth, and William A. Nierenberg—393
Magnetic moment of proton in units of Bohr magneton; magnetic moment of electron, Sidney Liebes, Jr., and Peter Franken—633
N^{14}-N^{15} hyperfine anomaly, L. Wilmer Anderson, Francis M. Pipkin, and James C. Baird, Jr.—87
Nuclear spin, hfs separation, and magnetic moment of 22-hr K^{42}, F. Russell Petersen, Vernon J. Ehlers, W. Bruce Ewbank, Lawrence L. Marino, and Howard A. Shugart—734
Nuclear spin-lattice relaxation in metals, A. G. Anderson and A. G. Redfield—583
Paramagnetic resonance and crystal field in two Ni-chelate crystals, Martin Peter—1432
Paramagnetic resonance of *S*-state ions in SrCl, W. Low and U. Rosenberger—621
Paramagnetic resonance spectra of Cr and Mn in spinel structure, R. Stahl-Brada and W. Low—561
Relaxation effects in maser material $K_3(CoCr)(CN)_6$, S. Shapiro and N. Bloembergen—1453
Spatial diffusion of spin energy, Alfred G. Redfield—315
Structure of *V* centers in irradiated $KClO_3$, T. E. Hasty, W. B. Ard, Jr., and W. G. Moulton—1459
Test of spin Hamiltonian for Fe^{3+} in $SrTiO_3$, Sol Aisenberg, H. Statz, and G. F. Koster—811
Theory of ferromagnetic resonance in rare earth garnets. II. Linewidths, P.-G. de Gennes, C. Kittel, and A. M. Portis—323
Theory of nuclear spin relaxation in superconductors, L. C. Hebel—79

Methods and Instruments
Microwaves (see also **Atomic Structure and Spectra; Magnetic Resonance; Molecular Structure and Spectra; Nuclear Moments and Spin**)
Absorption and dispersion of microwaves in flames, Jürgen Schneider and F. W. Hofmann—244
Frequency dependence of surface resistance of superconducting Sn in mm wavelength region, R. Kaplan, A. H. Nethercot, Jr., and H. A. Boorse—270
Incoherent microwave radiation from plasmas, G. Bekefi, Jay L. Hirshfield, and Sanborn C. Brown—1051
Microwave Faraday rotation in antiferromagnetic MnF_2, A. M. Portis and Dale Teaney—838
mm wave absorption in superconducting Al. I. Temperature dependence of energy gap, Manfred A. Biondi and M. P. Garfunkel—853; II. Calculation of skin depth, Manfred A. Biondi and M. P. Garfunkel—862
Power saturation of $J=1 \rightarrow 2$ rotational transition of OCS, A. Dymanus—351
Miscellaneous
Mobility of Ions and Electrons (see **Ions and Electrons, Mobility**)
Molecular Aggregates
Faraday effect in Ce phosphate glasses at low temperatures, P. B. Alers—1483
Molecular Beams (see **Atomic and Molecular Beams**)
Molecular Structure and Spectra
Measurement of excitation of N_2, CO, and He by electron impact, G. J. Schulz—1141
New method for calculating wave functions in crystals and molecules, James C. Phillips and Leonard Kleinman—287
Power saturation of $J=1 \rightarrow 2$ rotational transition of OCS, A. Dymanus—351
Theory of fine structure of microwave spectrum of NO_2, Chun C. Lin—903
Moments, Nuclear (see **Nuclear Moments and Spin**)
Moments of Molecules (see **Molecular Structure and Spectra**)
Muonium (see **Atomic Structure and Spectra; Mesons and Hyperons**)
Neutrinos and Antineutrinos (see also **Nuclear Spectra; Radioactivity**)
Determination of β-decay interaction from electron-neutrino angular correlation measurements, J. S. Allen, R. L. Burman, W. B. Herrmannsfeldt, P. Stähelin, and T. H. Braid—134
Neutrino detection by resonance absorption in crystals at low temperature, William M. Visscher—1581
Neutron Diffraction (see **Diffraction; Scattering of Neutrons**)
Neutrons (see **Elementary Particle Interactions**)
Noise
Nuclear Fission
Angular distribution of fragments from neutron-induced fission of U^{233} and Pu^{239}, L. Blumberg and R. B. Leachman—102
Direct-interaction effects in medium-energy fission of uranium, W. J. Nicholson and I. Halpern—175
Energy dependence of fission fragment anisotropy, James J. Griffin—107
Ionization yields for fission fragments, N. G. Utterback and G. H. Miller—976
Neutron-induced fission cross section of Np^{237}, H. W. Schmitt and R. B. Murray—1575
Resonance fission widths of U^{235} for levels from 6 ev to 50 ev, W. W. Havens, Jr., E. Melkonian, L. J. Rainwater, and J. L. Rosen—1538
Spallation-fission competition in heavy element reactions: $Th^{232}+He^4$ and $U^{233}+d$, Bruce M. Foreman, Jr., Walter M. Gibson, Richard A. Glass, and Glenn T. Seaborg—382
Surface coupling mechanism for approaching statistical equilibrium in compound nucleus formation, with application to fission, Lawrence Wilets—372
Nuclear Forces (see **Elementary Particle Interactions; Field Theory; Nuclear Structure Theory**)
Nuclear Induction (see **Magnetic Resonance; Nuclear Moments and Spin**)
Nuclear Isomers (see **Nuclear Spectra; Radioactivity**)
Nuclear Moments and Spin
Cd^{111}-Cd^{113} nuclear moment ratio and hyperfine anomaly, M. P. Klein and J. S. Waugh—960
Hfs and nuclear moments of Br^{82}, Hugh L. Garvin, Thomas M. Green, Edgar Lipworth, and William A. Nierenberg—393
Magnetic moment of proton in units of Bohr magneton; magnetic moment of electron, Sidney Liebes, Jr., and Peter Franken—633
Nuclear spin, hfs separation, and magnetic moment of 23-hr K^{42}, F. Russell Petersen, Vernon J. Ehlers, W. Bruce Ewbank, Lawrence L. Marino, and Howard A. Shugart—734
Polarization of γ rays in Pb^{207}, P. H. Stelson, W. G. Smith, and F. K. McGowan—167
Zero-spin excited state in Ca^{42}, I. Asplund and T. Wiedling—741
Nuclear Photoeffects
Effect of nuclear forces on cross sections of photonuclear reactions, K. Okamoto—428
γ rays from nuclear photoeffect in C, O, and Cu, A. S. Penfold and E. L. Garwin—120
$(\gamma,2n)$ reactions in light elements, J. O'Connell, P. Dyal, and J. Goldemberg—173
Neutron yields from targets bombarded by electrons, W. C. Barber and W. D. George—1551
Photoproduction of π mesons, S. Gartenhaus and R. Blankenbecler—1305
Nuclear Reactions, General (see also **Elementary Particle Interactions; Scattering**)
Angular distribution of Li^8 from $Be^9(Li^7,Li^8)Be^8$, E. Norbeck, J. M. Blair, L. Pinsonneault, and R. J. Gerbracht—1560

Nuclear Reactions, General (Continued)
Cross section for compound-nucleus formation in heavy-ion-induced reactions, T. Darrah Thomas—703
Excited states of B^{13}, G. C. Morrison and J. A. Galey—1583
Imaginary part of optical potential, L. C. Gomes—1226
Mathematical analysis of simple model related to stripping reaction, Elliott Lieb and Heinz Koppe—367
Monte Carlo calculations of nuclear evaporation processes. III. Applications to low-energy reactions, I. Dostrovsky, Z. Fraenkel, and G. Friedlander—683
Neutrino detection by resonance absorption in crystals at low temperature, William M. Visscher—1581
Neutron yields from targets bombarded by electrons, W. C. Barber and W. D. George—1551
Nuclear reactions in stars. IV. Buildup from carbon, H. Reeves and E. E. Salpeter—1505
Plausibility of nonlocal optical model, Y. C. Tang, R. H. Lemmer, P. J. Wyatt, and A. E. S. Green—402
Reaction mechanism in direct interaction inelastic scattering, Bernard L. Cohen—426

Nuclear Reactions Induced by α Particles and He^3 (see also **Scattering of α Particles**)
Differential cross sections for $Be^9(He^3,p)B^{11}$ reaction, E. A. Wolicki, H. D. Holmgren, R. L. Johnston, and E. Geer Illsley—1585
Excitation functions for α-induced reactions on Zn^{64}, Norbert T. Porile—1620(E)
Nuclear energy levels in C^{13}, N^{13}, N^{14}, N^{15}, O^{15}, and F^{18} from He^3-induced reactions, T. E. Young, G. C. Phillips, R. R. Spencer, and D. A. A. S. N. Rao—962
Production of Be^7 in 30–42 Mev He-ion bombardment of O, Al, and Cu, George H. Bouchard, Jr., and A. W. Fairhall—160
Reactions of α particles with Ge^{70} and Zn^{70}, Saadia Amiel—415
Reactions of Cu^{63} and Cu^{65} with α particles, Norbert T. Porile and David L. Morrison—1193
Spallation-fission competition in heavy element reactions: $Th^{232}+He^4$ and $U^{233}+d$, Bruce M. Foreman, Jr., Walter M. Gibson, Richard A. Glass, and Glenn T. Seaborg—382

Nuclear Reactions Induced by Deuterons and Tritons (see also **Scattering of Deuterons and Tritons**)
$C^{12}(d,n)N^{13}$ reaction, A. Elwyn, J. V. Kane, S. Ofer, and D. H. Wilkinson—1490
Evidence for polarization of B^{12} nuclei produced in (d,p) reaction, L. F. Chase, Jr., and G. Igo—170
Excitation function for $Al^{27}(d,\alpha p)Na^{24}$ reaction between 0 and 28.1 Mev, P. A. Lenk and R. J. Slobodrian—1229
Low-lying energy levels in Sc^{41}, H. S. Plendl and F. E. Steigert—1534
Mathematical analysis of simple model related to stripping reaction, Elliott Lieb and Heinz Koppe—367
Polarization of protons in $C^{12}(d,p)C^{13}$, R. G. Allas and F. B. Shull—996
Reaction mechanism in direct interaction inelastic scattering, Bernard L. Cohen—426
Spallation-fission competition in heavy element reactions: $Th^{232}+He^4$ and $U^{233}+d$, Bruce M. Foreman, Jr., Walter M. Gibson, Richard A. Glass, and Glenn T. Seaborg—382
Three-body breakup; deuteron dissociation cross sections, James E. Young—1201
Violation of isotopic spin selection rule in $Ca^{40}(d,\alpha)K^{38}$ reaction, Y. Hashimoto and W. Parker Alford—981

Nuclear Reactions Induced by Mesons and Hyperons (see also **Elementary Particle Interactions; Mesons and Hyperons; Scattering of Mesons and Hyperons**)
μ-meson capture in Li^6 leading to ground state of He^6, H. Überall—218
Muon capture by C^{12} and β decay of B^{12}, G. Flamand and K. W. Ford—1591
Panofsky ratio for negative pions absorbed in hydrogen, E. L. Koller and A. M. Sachs—760

Nuclear Reactions Induced by Neutrons (see also **Elementary Particle Interactions; Scattering of Neutrons**)
Angular distribution of fragments from neutron-induced fission of U^{233} and Pu^{239}, L. Blumberg and R. B. Leachman—102
Calculations of neutron capture cross sections, C. Mossin-Kotin, B. Margolis, and E. S. Troubetzkoy—937
Conservation of parity in strong interactions, R. Haas, L. B. Leipuner, and R. K. Adair—1221
Energy dependence of fast-neutron activation cross sections, A. E. Johnsrud, M. G. Silbert, and H. H. Barschall—927
Neutron-induced fission cross section of Np^{237}, H. W. Schmitt and R. B. Murray—1575
Total neutron cross section of Xe and Kr, D. P. Mann, W. W. Watson, R. E. Chrien, R. L. Zimmerman, and R. B. Schwartz—1516

Nuclear Reactions Induced by Protons (see also **Elementary Particle Interactions; Scattering of Protons**)
Angular distributions of deuterons from $Li^7(p,d)Li^6$ reactions, E. F. Bennett and D. R. Maxson—131
Energy determination from multiple meson production by 6.3-Bev protons in nuclear emulsion, P. L. Jain and H. C. Glahe—458
Levels of P^{29} from $Si^{28}(p,p)Si^{28}$ and $Si^{28}(p,p')Si^{28*}$, J. Vorona, J. W. Olness, W. Haeberli, and H. W. Lewis—1563
Neutron spectra from $p+d$ reaction, C. Wong, J. D. Anderson, C. C. Gardner, J. W. McClure, and M. P. Nakada—164
Neutrons from proton bombardment of Li^6 and Li^7, F. Ajzenberg-Selove, C. F. Osgood, and C. P. Baker—1521
Radiative proton capture by O^{16}, J. W. Butler and H. D. Holmgren—1485
Reaction mechanism in direct interaction inelastic scattering, Bernard L. Cohen—426
Total reaction and elastic scattering cross sections for 22.8-Mev protons on U isotopes, Clyde B. Fulmer—418

Nuclear Scattering (see **Scattering**)

Nuclear Spectra (see also **Nuclear Reactions; Radioactivity**)
Angular correlation of Cd^{114} γ rays in single crystals of In, Arthur G. Duneer, Jr.—999
β decay of Cd^{115m}, O. E. Johnson and W. G. Smith—992
Charge spectrometry for Kr^{79}-Br^{79}, Arthur H. Snell, F. Pleasonton, and John L. Need—1548
Collective enhancement of $E2$ matrix elements in light nuclei, S. Fallieros and R. A. Ferrell—660
Conversion electron spectrum of Np^{239} and level scheme of Pu^{239}, G. T. Ewan, J. S. Geiger, R. L. Graham, and D. R. McKenzie—950
Coulomb excitation of nuclei by Li^6 and Li^7 projectiles, C. S. Littlejohn and G. C. Morrison—1526
Coulomb excitation of states in Pt^{195}, F. K. McGowan and P. H. Stelson—154
Decay of U^{240} and 7.3-min Np^{240}, M. E. Bunker, B. J. Dropesky, J. D. Knight, J. W. Starner, and B. Warren—143
Decay schemes of C^{15}, N^{16}, and O^{19}, D. E. Alburger, A. Gallmann, and D. H. Wilkinson—939
Determination of β-decay interaction from electron-neutrino angular correlation measurements, J. S. Allen, R. L. Burman, W. B. Herrmannsfeldt, P. Stähelin, and T. H. Braid—134
Determination of low-energy region of tritium β spectrum, D. C. Conway and W. H. Johnston—1544
Directional and polarization correlation measurements on Eu^{152m}, G. T. Wood—1499
Dy^{159} radioactive decay, B. H. Ketelle and A. R. Brosi—98
Electron capture decay of Lu^{173} to levels in Yb^{173}, J. W. Bichard, J. W. Mihelich, and B. Harmatz—720
Excited states of B^{13}, G. C. Morrison and J. A. Galey—1583

γ rays from nuclear photoeffect in C, O, and Cu, A. S. Penfold and E. L. Garwin—120
Half-life and β spectrum of Rb^{87}, K. F. Flynn and L. E. Glendenin—744
Levels of P^{29} from $Si^{28}(p,p)Si^{28}$ and $Si^{28}(p,p')Si^{28*}$, J. Vorona, J. W. Olness, W. Haeberli, and H. W. Lewis—1563
Lifetimes of 2^+ rotational states, M. Birk, G. Goldring, and Y. Wolfson—730
Low-lying energy levels in Sc^{41}, H. S. Plendl and F. E. Steigert—1534
Mass assignments and some decay characteristics of Ge^{145}, Eu^{145}, Gd^{146}, and Eu^{146}, J. Robb Grover—406
Measurement of L/K-capture ratio in Fe^{55} decay, J. Scobie, R. B. Moler, and R. W. Fink—657
Muon capture by C^{12} and β decay of B^{12}, G. Flamand and K. W. Ford—1591
Neutrons from proton bombardment of Li^6 and Li^7, F. Ajzenberg-Selove, C. F. Osgood, and C. P. Baker—1521
Nuclear energy levels in C^{13}, N^{13}, N^{14}, N^{15}, O^{15}, and F^{18} from He^3-induced reactions, T. E. Young, G. C. Phillips, R. R. Spencer, and D. A. A. S. N. Rao—962
Nuclear resonance fluorescence in Ce^{140}, S. Ofer and A. Schwarzschild—725
Nucleon structural corrections to first forbidden unique β transitions, J. F. Dreitlein—1604
Polarization of γ rays in Pb^{207}, P. H. Stelson, W. G. Smith, and F. K. McGowan—167
Radiative proton capture by O^{18}, J. W. Butler and H. D. Holmgren—1485
Search for low-energy γ rays in O^{16}, William W. Pratt and Robert G. Cochran—1578
Search for positron emission in K^{40}, D. R. Tilley and Leon Madansky—413
Tb^{150}: new Tb isotope, K. S. Toth, S. Bjørnholm, M. Jorgensen, O. B. Nielsen, and O. Skilbreid—118
Zero-spin excited state in Ca^{42}, I. Asplund and T. Wiedling—741

Nuclear Structure Theory (see also **Nuclear Reactions; Nuclear Spectra**)
Calculations of neutron capture cross sections, C. Mossin-Kotin, B. Margolis, E. S. Troubetzkoy—937
Collective enhancement of $E2$ matrix elements in light nuclei, S. Fallieros and R. A. Ferrell—660
Conservation of parity in strong interactions, R. Haas, L. B. Leipuner, and R. K. Adair—1221
Effect of nuclear forces on cross sections of photonuclear reactions, K. Okamoto—428
Effects of particle-particle interaction on moment of inertia of many-fermion systems, Ronald M. Rockmore—469
Generalized atomic mass law, Forrest S. Mozer—970
Imaginary part of optical potential, L. C. Gomes—1226
Modified Hartree-Fock method for finite nucleus, K. A. Brueckner and D. T. Goldman—424
Monte Carlo calculations of nuclear evaporation processes. III. Applications to low-energy reactions, I. Dostrovsky, Z. Fraenkel, and G. Friedlander—683
Nucleon structural corrections to first forbidden unique β transitions, J. F. Dreitlein—1604
Phenomenological nuclear interaction derived from binding energies, R. Thieberger—713
Plausibility of nonlocal optical model, Y. C. Tang, R. H. Lemmer, P. J. Wyatt, and A. E. S. Green—402
Stability of nuclear matter, K. Sawada and R. M. Rockmore—1618
Surface coupling mechanism for approaching statistical equilibrium in compound nucleus formation, with application to fission, Lawrence Wilets—372
Theoretical calculation of binding energy of O^{16}, Paul Goldhammer—676

Optical Instruments (see **Methods and Instruments**)
Optical Properties (see also **Luminescence**)
Depletion-layer photoeffects in semiconductors, Wolfgang W. Gärtner—84
Effect of simultaneous Doppler and collision broadening and of hfs on imprisonment of resonance radiation, P. J. Walsh—511
Effects of electron correlation on optical properties of metals, P. A. Wolff—544
Effects of polarized light on photocurrents and photovoltages in ZnS, G. Cheroff, R. C. Enck, and S. P. Keller—1091
Faraday effect in Ce phosphate glasses at low temperatures, P. B. Alers—1483
New parallel photoelectromagnetic effect, A. Amith—330
Optical absorption in pure single crystal InSb at 298° and 78°K, S. W. Kurnick and John M. Powell—597
Optical absorption of CoO and MnO above Néel temperature, G. W. Pratt, Jr., and Roland Coelho—281
Optical anisotropy of tetragonal $BaTiO_3$, Wataru Kinase, Jinzo Kobayashi, and Noboru Yamada—348
Polarized light transmission of $BaTiO_3$ single crystal, R. C. Casella and S. P. Keller—1469
Ultraviolet absorption of alkali halides, J. E. Eby, K. J. Teegarden, and D. B. Dutton—1099

Pair Production (see **Electrons and Positrons**)
Parity (see **Elementary Particle Interactions; Field Theory; Nuclear Spectra**)
Phosphors and Phosphorescence (see **Luminescence; Semiconductors**)
Photoconductivity (see **Electrical Conductivity and Resistance**)
Photodisintegration (see **Nuclear Photoeffects**)
Photoelasticity (see **Elasticity and Plasticity**)
Photoelectric Effect (see **Electrical Properties**)
Photomagnetoelectric Effect (see **Electrical Conductivity and Resistance**)
Photography and Photographic Emulsions (see **Methods and Instruments; Optical Properties**)
Photons (see **Radiation**)
Photovoltaic Effect (see **Electrical Properties; Semiconductors**)
Piezoelectric Effect (see **Dielectrics and Dielectric Properties**)
Plasma Physics (see also **Crystalline State; Electrical Conductivity and Resistance; Electrical Discharges; Fluid Dynamics; Statistical Mechanics and Thermodynamics**)
Absorption and dispersion of microwaves in flames, Jürgen Schneider and F. W. Hofmann—244
Buildup of discharge in argon, M. Menes—481
Conductivity of warm plasma, Lyman Mower—16
Incoherent microwave radiation from plasmas, G. Bekefi, Jay L. Hirshfield, and Sanborn C. Brown—1051
Occurrence of Vavilov-Čerenkov radiation in high-temperature plasma, Jacob Neufeld—1
Propagation of electromagnetic waves in multistream medium at gyromagnetic resonance, Jacob Neufeld—19; 1620(E)
Scattering potentials in fully ionized gases, O. Theimer and R. Gentry—787
Spectral and angular distribution of cyclotron radiation emitted by colliding particles, Ludwig Oster—474
Stark broadening of hydrogen lines in plasma, Hans R. Griem, Alan C. Kolb, and K. Y. Shen—4
Transport phenomena in slightly ionized gases: low electric fields, Mahendra Singh Sodha—486
Plasticity (see **Elasticity and Plasticity**)
Polarization, Electrical (see **Dielectrics and Dielectric Properties**)
Polymers (see **Molecular Aggregates**)

Positronium (see **Atomic Structure and Spectra; Electrons and Positrons**)
Positrons (see **Electrons and Positrons**)
Probability (see **Mathematical Methods**)
Protons (see **Elementary Particle Interactions**)

Quantum Electrodynamics (see also **Field Theory**)
Quantum Mechanics
Pluvinage method for systems of three charged particles, Larry Spruch and Martin Kelly—911
Quenching of Radiation (see **Radiation**)

Radiation (see also **Gamma Rays; Range and Energy Loss; X Rays**)
Bremsstrahlung and photoelectric effect as inverse processes, Kirk W. McVoy and U. Fano—1168
Effect of simultaneous Doppler and collision broadening and of hfs on imprisonment of resonance radiation, P. J. Walsh—511
High-frequency limit of bremsstrahlung in Sauter approximation, U. Fano—1156
Incoherent microwave radiation from plasmas, G. Bekefi, Jay L. Hirshfield, and Sanborn C. Brown—1051
Interference of orbital and spin currents in bremsstrahlung and photoelectric effect, U. Fano, K. W. McVoy, and James R. Albers—1159
Occurrence of Vavilov-Čerenkov radiation in high-temperature plasma, Jacob Neufeld—1
Radiation produced by electron beam passing through dielectric medium, Jacob Neufeld—785
Relative measurement of photodetachment cross section for H^-, Stephen J. Smith and David S. Burch—1125
Sauter theory of photoelectric effect, U. Fano, K. W. McVoy, and James R. Albers—1147
Spectral and angular distribution of cyclotron radiation emitted by colliding particles, Ludwig Oster—474
Radioactivity (see also **Nuclear Spectra**)
Decay of U^{240} and 7.3-min Np^{240}, M. E. Bunker, B. J. Dropesky, J. D. Knight, J. W. Starner, and B. Warren—143
Half-life and β spectrum of Rb^{87}, K. F. Flynn and L. E. Glendenin—744
Search for positron emission in K^{40}, D. R. Tilley and Leon Madansky—413
Raman Spectra (see **Molecular Structure and Spectra**)
Range and Energy Loss (see also **Scattering**)
Ionization yields for fission fragments, N. G. Utterback and G. H. Miller—976
Occurrence of Vavilov-Čerenkov radiation in high-temperature plasma, Jacob Neufeld—1
Origin of characteristic electron energy losses in Mg, C. J. Powell and J. B. Swan—81
Theory of displacement cascades in compounds, E. M. Baroody—1418
Recombination (see **Molecular Structure and Spectra**)
Relativity and Gravitation
Active gravitational mass, Charles W. Misner and Peter Putnam—1045
Completion and embedding of Schwarzschild solution, C. Fronsdal—778
Dynamical structure and definition of energy in general relativity, R. Arnowitt, S. Deser, and C. W. Misner—1322
Exact three-variable solutions of field equations of general relativity, B. Kent Harrison—1285
General relativistic fluid spheres, H. A. Buchdahl—1027
Invisibility of Lorentz contraction, James Terrell—1041
Rigid frames in relativity, Ezra T. Newman and Allen I. Janis—1610
Uniform electromagnetic field in theory of general relativity, B. Bertotti—1331

Resistance, Electrical (see **Electrical Conductivity and Resistance**)
Resonance Radiation (see **Radiation**)

Scattering, General (see also **Diffraction; Elementary Particle Interactions; Nuclear Reactions; Range and Energy Loss**)
Elastic scattering of O^{16} from nuclei, J. A. McIntyre, S. D. Baker, and T. L. Watts—1212
Plausibility of nonlocal optical model, Y. C. Tang, R. H. Lemmer, P. J. Wyatt, and A. E. S. Green—402
Scattering potentials in fully ionized gases, O. Theimer and R. Gentry—787
Upper bounds on scattering lengths for static potentials, Larry Spruch and Leonard Rosenberg—1034
Scattering of α Particles and He^3 (see also **Nuclear Reactions Induced by α Particles and He^3**)
Scattering of 18-Mev α particles by C^{13}, O^{16}, and S^{32}, J. C. Corelli, E. Bleuler, and D. J. Tendam—1184
Scattering of Atoms and Molecules (see **Atomic and Molecular Beams**)
Scattering of Deuterons and Tritons (see also **Nuclear Reactions Induced by Deuterons and Tritons**)
Scattering of Electrons and Positrons (see also **Electrons and Positrons**)
Application of sum rules to electron-deuteron scattering, J. I. Friedman—1257
Bremsstrahlung and photoelectric effect as inverse processes, Kirk W. McVoy, and U. Fano—1168
Collisions of electrons with H atoms. IV. Excitation of Lyman-α radiation near threshold, Wade L. Fite, R. F. Stebbins, and R. T. Brackman—356
Cross sections for excitation of metastable $2s$ state of atomic H by electron collision, William Lichten and Sheldon Schultz—1132
Double scattering of electrons with dipole moment, M. H. Zaidi—241
Elastic scattering of low-energy electrons by A, B. Kivel—926
Electron scattering by noble gases in limit of zero energy, Bennett Kivel—1484
High-frequency limit of bremsstrahlung in Sauter approximation, U. Fano—1156
Interference of orbital and spin currents in bremsstrahlung and photoelectric effect, J. Fano, K. W. McVoy, and James R. Albers—1159
Measurement of excitation of N_2, CO, and He by electron impact, G. J. Schulz—1141
Nucleon correlation effects in high-energy electron scattering, W. E. Drummond—183
Origin of characteristic electron energy losses in Mg, C. J. Powell and J. B. Swan—81
Sauter theory of photoelectric effect, U. Fano, K. W. McVoy, and James R. Albers—1147
Scattering of electrons by neutral atoms, Bernard A. Lippmann, Marvin H. Mittleman, and Kenneth M. Watson—920
Scattering of electrons from atomic hydrogen, A. Temkin—358
Scattering of Mesons and Hyperons (see also **Mesons and Hyperons; Nuclear Reactions Induced by Mesons and Hyperons**)
Elastic π^+-p and p-p scattering at 1.23 Bev/c, L. O. Roellig and D. A. Glaser—1001
Meson-nucleon scattering and nuclear forces, Victor F. Weisskopf—1615
Scattering of μ mesons from Pb nuclei, B. Chidley, P. Goldstein, G. Hinman, R. Summers, and R. Adler—1015
Scattering of negative mesons by H at 130 and 152 Mev, U. E. Kruse and R. C. Arnold—1008
Scattering of 3.7–25 Mev positive pions by hydrogen, G. E. Fischer and E. W. Jenkins—749

Scattering of Neutrons (see also **Nuclear Reactions Induced by Neutrons**)
Compound elastic scattering of 4.2-Mev neutrons in Pb, P. L. Okhuysen and J. T. Prud'homme—986
Differential elastic scattering of 14-Mev neutrons by Zn, Sn, Sb, Pb, and Bi, L. A. Rayburn—1571
Vibrational spectrum of vanadium, D. N. Singh and W. A. Bowers—279
Scattering of Protons (see also **Nuclear Reactions Induced by Protons**)
Elastic π^{+}-p and p-p scattering at 1.23 Bev/c, L. O. Roellig and D. A. Glaser—1001
Modified analysis of nucleon-nucleon scattering. II. Completed analysis of p-p scattering at 310 Mev, Malcolm H. MacGregor, Michael J. Moravscik, and Henry P. Stapp—1248
p-p polarization at 16 Mev, William A. Blanpied—738
p-p scattering at 10 Mev, L. H. Johnston and D. E. Young—989
Proton α-particle scattering at 20.1 Mev, J. W. Burkig—674
Total reaction and elastic scattering cross sections for 22.8-Mev protons on U isotopes, Clyde B. Fulmer—418
Scattering of Radiation (see **Gamma Rays; Radiation; X Rays**)
Scintillation Counters (see **Methods and Instruments**)
Secondary Emission (see **Electrical Properties**)
Semiconductors
Correlation energy in model semiconductor, J. Callaway—1368
Crystal potential and energy bands of semiconductors. I. Self-consistent calculations for diamond, Leonard Kleinman and James C. Phillips—880
Dendritic growth of Ge crystals, A. I. Bennett and R. L. Longini—53
Depletion-layer photoeffects in semiconductors, Wolfgang W. Gärtner—84
Electron emission from Si p-n junctions, B. Senitzky—874
Electronic surface states and cleaned Ge surface, Paul Handler and William M. Portnoy—516
Energy levels in neutron-irradiated n-type Si, G. Rupprecht and C. A. Klein—342
High-field effect in B-doped Si, R. D. Larrabee—300
Nature of defects arising from fast neutron irradiation of Si single crystals, Rohn Truell—890
New parallel photoelectromagnetic effect, A. Amith—330
Optical absorption in pure single crystal InSb at 298° and 78°K, S. W. Kurnick and John M. Powell—597
Photoconductive and photoelectromagnetic lifetime determination in presence of trapping. I. Small signals, A. Amith—793
Shock Waves (see **Fluid Dynamics**)
Solid State (see **Crystalline State**)
Sound (see **Acoustics**)
Spallation (see **Nuclear Reactions**)
